Circular Economy in Developed and Developing Countries Elena G. Popkova,Aleksei V. Bogoviz,2020-11-09 *Circular Economy in Developed and Developing Countries Perspective Methods And Examples* develops a new approach to research founded on the idea that ecological crisis is proof of the necessity for formation of circular economy Sexism in the City James Taylor,2025-02-20 *Sexism in the City* is the first book to trace the history of women stockbrokers in the United Kingdom from the late nineteenth to the late twentieth centuries Forgotten pioneers these businesswomen fought against the odds to establish successful brokerages across the country and in the process challenged society s beliefs about women and money The book also tells the story of how the nation s stock exchanges denied them membership for generations mobilizing increasingly desperate arguments to try to justify their exclusion until women finally won the right to join the London Stock Exchange in 1973 Though historians have recently reassessed women s role in the development of capitalism highlighting their roles as investors and entrepreneurs they have assumed that because women were not members of stock exchanges

they were not active as financial intermediaries until modern times By spotlighting the lives and careers of women who worked as stockbrokers outside male monopolized institutions this book reframes the historical development of finance in several ways It highlights the extent to which the seemingly gender neutral institutions and practices of finance were in fact based on gendered ideologies and exclusions It argues that focusing on institutions only reveals part of the financial ecosystem meaning that we miss what was happening outside the formal market And it challenges London centric interpretations of financial history asking questions about the financial cultures existing outside the metropolis If we look beyond the official exchanges and beyond London a more diverse financial environment comes into view The history uncovered in *Sexism in the City* also helps to address problems with financial culture in the twenty first century Current reform initiatives are unlikely to succeed unless they acknowledge that for hundreds of years professional identities and institutional structures in finance have been based on the denigration and marginalization of women Acknowledging the efforts of those female stockbrokers who challenged misogynistic beliefs and defied men s monopoly of high finance by forging their own careers is the first step towards imagining a different kind of market

Obesity in the News Gavin Brookes,Paul Baker,2021-11-25 Obesity is a pressing social issue and a persistently newsworthy topic for the media This book examines the linguistic representation of obesity in the British press It combines techniques from corpus linguistics with critical discourse studies to analyse a large corpus of newspaper articles 36 million words representing ten years of obesity coverage These articles are studied from a range of methodological perspectives and analytical themes include variation between newspapers change over time diet and exercise gender and social class The volume also investigates the language that readers use when responding to obesity representations in the context of online comments The authors reveal the power of linguistic choices to shame and stigmatise people with obesity presenting them as irresponsible and morally deviant Yet the analysis also demonstrates the potential for alternative representations which place greater focus on the role that social and political forces play in this topical health issue
