Neuroscience of Human Attachment Anna Buchheim ,Carol George,Harald Gündel,Roberto Viviani,2017-08-15

Attachment is a biologically emotion regulation based system guiding cognitive and emotional processes with respect to intimate and significant relationships Secure relationships promote infants exploration of the world and expand their mastery of the environment Adverse attachment experiences like maltreatment loss and separation have long been known to have enduring unfavorable effects on human mental health Research on the neurobiological basis of attachment started with animal studies focusing on emotional deprivation and its behavioral molecular and endocrine consequences The present book presents an interdisciplinary synthesis of existing knowledge and new perspectives on the human neuroscience of attachment showing the tremendous development of this field The following chapters include innovative studies that are representative of the broad spectrum of current approaches These involve both differing neurobiological types of substrates using measures like fMRI EEG psychophysiology endocrine parameters and genetic polymorphisms as well as psychometric approaches to classify attachment patterns in individuals The findings we have acquired in the meanwhile on the neural substrates of

attachment in healthy subjects lay the foundation of studies with clinical groups The final section of the book addresses evidence on changes in the functioning of these neural substrates in psychopathology

Constructions in Use Alexander auf der Straße, 2017-07-03 Semantics is one of the core disciplines of philosophy of language There are basically two strands of established theories use based and truth conditional with the latter being the dominant variety This dominance has been questioned recently by linguists who embrace a research paradigm that is known as construction grammar As construction grammar is use based it seems natural to suppose that its success is indirect support for use based semantics in philosophy This is true But there s still a lot to do Although there are use based theories that fit quite well with current research in linguistics they are far from being perfect In particular the most popular theory in that area is still tied to some of the main motivations behind truth conditional semantics **Constructions in Use** offers an alternative by proposing to let this legacy go Instead it argues that philosophical semantics is best off if it goes for an entirely use based theory

An Examination of Logical Positivism Julius Rudolph Weinberg, 2013-12-19 First published in 2000 This is Volume II of six in the Library of Philosophy series on the Philosophy of Science Written in 1938 philosophical systems which employ logical methods almost exclusively would undoubtedly be expected to produce non empirical results If however logic is taken simply as a method of connecting meanings it is not difficult to reconcile logical methods with empirical results If logical formular in other words assert nothing about the meanings of propositions but simply show how such meanings are connected then an empiricism based on a logical analysis of meanings is not inconsistent This is what the Logical Positivists have attempted to do This book looks at two areas the foundations of a scientific method free from metaphysics and the elimination of pseudo concepts introduced by metaphysics into science and philosophy

The Ups and Downs of Child Language Andrea Gualmini, 2014-04-08 The new experimental evidence presented in *The Ups and Downs of Child Language* shows that it is possible to extend research on child language to children s semantic competence adopting the same theoretical framework that has proven useful to the study of children s syntactic competence Andrea Gualmini investigates the role of entailment relations for child language in a series of interconnected experiments assessing children s negation and their interpretation of words like or every and some Comparing his study to other models of language acquisition and characterizing the observed differences between children and adults Gualmini asserts that even in the domain of semantic competence there is no reason to assume that child language differs from adult language in ways that would exceed the boundary conditions imposed by Universal Grammar

Romance Linguistics Ana Teresa Pérez Leroux, Yves Roberge, 2003 This volume contains a selection of refereed and revised papers originally presented at the 32nd Linguistics Symposium on Romance Languages dealing with linguistic theory as applied to the Romance languages and on empirical studies on the acquisition of Romance with studies on Romanian French Spanish Portuguese Italian Romansch and Latin The theoretical section contains contributions concentrating on specific properties of Romance at the syntax semantics interface on morphosyntactic issues

on subject licensing and case and on phonology The acquisition section includes contributions on first bilingual and second language acquisition of functional structure word structure quantification and stress

Questions & Answers Lewis R. Katz, Neil P. Cohen, 2009 Questions and Answers Criminal Procedure will assist your learning and exam preparation in criminal procedure courses and for the bar exam The subject matter of the book extends to all major subjects covered in criminal procedure courses Some schools divide criminal procedure courses into Criminal Procedure I police practices and II prosecution This book includes the material in both courses The book consists of multiple choice questions and answers and short essay questions and answers for both courses The Criminal Procedure I materials cover arrest search and seizure interrogation identification suppression issues and entrapment Those topics are found in Questions 1 through 100 and the practice final exam for Criminal Procedure I can be found in Questions 228 through 252 The Criminal Procedure II materials cover discretion to prosecute bail complaint initial appearance preliminary hearing grand jury plea bargaining joinder and severance motion practice discovery time limitations jurisdiction and venue trial double jeopardy and postconviction remedies Those topics are found in Questions 101 through 227 and the practice final exam for Criminal Procedure II can be found in Questions 253 through 277 For each multiple choice question in Q A Criminal Procedure Professors Katz and Cohen provide a detailed answer that indicates which of four options is the best answer and explains thoroughly why that option is better than the other three options Each short answer question is designed to be answered in fifteen minutes or less For these questions Professors Katz and Cohen provide a thoughtful comprehensive yet brief model answer

Directival Theory of Meaning Paweł Grabarczyk, 2019-06-18 This book presents a new approach to semantics based on Kazimierz Ajdukiewicz's Directival Theory of Meaning DTM which in effect reduces semantics of the analysed language to the combination of its syntax and pragmatics The author argues that the DTM was forgotten because for many years philosophers didn't have conceptual tools to appreciate its innovative nature and that the theory was far ahead of its time The book shows how a redesigned and modernised version of the DTM can deliver a new solution to the problem of defining linguistic meaning and that the theory can be understood as a new type of functional role semantics The defining feature of the DTM is that it presents meaning as a product of constraints on the usage of words According to the DTM meaning is not use but the avoidance of misuse Readers will see how the DTM was shelved for reasons that we don't find so dramatic anymore and how it contains enough original ideas and solutions to warrant developing it into a full blown contemporary account It is shown how many of the underlying ideas of the theory have been embraced later by philosophers and treated simply as brute facts about natural languages or even as new philosophical discoveries Philosophers of language and researchers with an interest in how languages and the mind work will find this book a fascinating read

Causation and Reasoning

Constructions Masaru Kanetani, 2019-03-15 Causation and reasoning are different but related types of relationships Both causal relations and reasoning processes may be expressed with one and the same connective word in some languages English speakers use because and Japanese speakers use kara How then are causation and reasoning processes related to and different from each other How do we construe and encode them How is because different from other conjunctions with similar meanings To account for these and related empirical questions this book presents an integrated analysis in accordance with the original principles of Construction Grammar In particular the book shows that the analysis proposed is compatible with our general knowledge about causation and reasoning and that it is valid for English and Japanese The proposed analysis is also comprehensively applicable to a variety of related phenomena ranging from the just because X doesn't mean Y construction to the innovative and less known because X construction

, 1901 *Variation in the Input* Merete Anderssen, Kristine Bentzen, Marit Westergaard, 2010-09-22 The topic of variation in language has received considerable attention in the field of general linguistics in recent years This includes research on

linguistic micro variation that is dependent on fine distinctions in syntax and information structure However relatively little work has been done on how this variation is acquired This book focuses on how different types of variation are expressed in the input and how this is acquired by young children The collection of papers includes studies of the acquisition of variation in a number of different languages including English German Greek Italian Korean Norwegian Swiss German Ukrainian and American Sign Language Different kinds of linguistic variation are considered ranging from pure word order variation to optionally doubly filled COMPs and the resolution of scopal ambiguities In addition papers in the volume deal with the extreme case of variation found in bilingual acquisition
