

04.01 The Terrible 1300s

—What was the Great Famine, where and when was it, and what caused it?

The Great Famine occurred in Europe and Russia from 1315-1317. This was caused by the harsh weather conditions, which created a lack of plentiful food sources.

—How did the bubonic plague reach Europe? What is its more famous name?

The Black Death was a devastating global epidemic of bubonic plague that struck Europe and Asia in the mid-1300s. The plague arrived in Europe in October 1347, when 12 ships from the Black Sea docked at the Sicilian port of Messina.

—What areas of the world were impacted by the plague?

Sicily (1347); North Africa, mainland Italy, Spain, and France (1348); and Austria, Hungary, Switzerland, Germany, and the Low Countries (1349).

—What were the major impacts of the Black Death on European society?

Trade suffered for a time, and wars were temporarily abandoned. Many laborers died, which devastated families through lost means of survival and caused personal suffering; landowners who used laborers as tenant farmers were also affected.

—What were a few theories Europeans had for what was causing the plague?

Some believed it was a punishment from God, some believed that foreigners or those who followed a different religion had poisoned the wells, some thought that bad air was responsible, some thought the position of the planets had caused the plague.
