Smallman-Raynor, Andrew D. Cliff, J. Keith Ord, Peter Haggett, 2022-02-10 The last half century has witnessed two landmark events in medical history The 1970s saw euphoria about the defeat of one of humankind's oldest disease scourges with the global eradication of smallpox To set against this the 2020s are experiencing the pandemic ravages of new viral diseases of which COVID 19 is currently the most potent But it is only the latest of a succession of threats A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics This resource focuses initially on the local scale of doctors practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent Such local area studies raise two questions First how and where do epidemic diseases emerge and second why do more diseases appear to be emerging now To approach such questions implies a shift in spatial gear from painting epidemics with a fine tipped local brush to an expanded palette on which doctors practices and small islands are replaced by regional and global populations Simultaneously time bands are extended backwards to the origins of civilization and forwards into the twenty first century It eventually leads to a consideration of global pandemics both historical for example plague cholera and influenza and contemporary HIV AIDS and COVID 19 and examines the ways the spread of infection can be prevented All chapters are extensively illustrated with full colour diagrams and maps some of which are in colour for the first time Bringing together the authors collective 150 years of experience in research mapping and writing on spatial aspects of medical history this is an invaluable resource for anyone interested in the spread control and eradication of epidemic and pandemic diseases *Oswaal ICSE Question Bank Class 10 Geography | Chapterwise | Topicwise | Solved Papers | For 2025 Board Exams* Oswaal Editorial Board, 2024-03-12 Description of the Product 100% Updated with Latest Syllabus Questions Typologies through which we have got you covered with the latest and 100% updated curriculum Crisp Revision with Topic wise Revision Notes Smart Mind Maps Study smart not hard Extensive Practice with 700 Questions Self Assessment Papers to give you 700 chances to become a champ Concept Clarity with 500 Concepts Concept Videos for you to learn the cool way with videos and mind blowing concepts 100% Exam Readiness with Expert Answering Tips Suggestions for Students for you to be on the cutting edge of the coolest educational trends **The Geography of the Everyday** Rob Sullivan, 2017-12-15 Anthropologists psychologists feminists and

sociologists have long studied the everyday the quotidian the taken for granted however geographers have lagged behind in engaging with this slippery aspect of reality Now Rob Sullivan makes the case for geography as a powerful conceptual framework for seeing the everyday anew and for pushing back against its givenness its capacity to so fade into the background that it controls us in dangerously unexamined ways Drawing on a number of theorists Foucault Goffman Marx Lefebvre H gerstrand and others Sullivan unpacks the concepts and perceived realities that structure everyday life while grounding them in real world cases such as Nigeria s troubled oil network the working poor in the United States China s urban villages and ultra high end housing in London and Cairo In examining the everyday from a geographical perspective Sullivan ranges widely across time space history geography Marxian reproduction the body and the geographical mind The everyday Sullivan suggests is where change occurs and where resistance to change can begin By locating the everyday through geography we can help to make change possible Whatever the issue be it struggles over race LGBT rights class inequality or global warming the transformations required to achieve social justice all begin with transformation of the everyday order Geographical Education Magazine ,1996
