Levine, Ph.D.,2012-10-30 Unraveling trauma in the body brain and mind a revolution in treatment Now in 17 languages In this culmination of his life s work Peter A Levine draws on his broad experience as a clinician a student of comparative brain research a stress scientist and a keen observer of the naturalistic animal world to explain the nature and transformation of trauma in the body brain and psyche In an Unspoken Voice is based on the idea that trauma is neither a disease nor a disorder but rather an injury caused by fright helplessness and loss that can be healed by engaging our innate capacity to self regulate high states of arousal and intense emotions Enriched with a coherent theoretical framework and compelling case examples the book elegantly blends the latest findings in biology neuroscience and body oriented psychotherapy to show that when we bring together animal instinct and reason we can become more whole human beings Zen Buddhism and the Reality of Suffering Tullio Giraldi,2024-09-10 This book offers an accessible guide to the role that Zen has played and alongside Buddhism might play in both Eastern and Western attempts to alleviate mental suffering Since its beginnings 2500 years ago the central belief of Buddhism has been that what we perceive as reality is a mental representation a religious belief which has since been substantiated by the evidence of neuroscience The work and progress of clinical medicine psychiatry and psychology have attempted to alleviate the sufferings of life but the current approaches to mental health in psychiatry the neurosciences and cognitivism don t fully address the complexity and mutual inter relationship of the variety of factors involved in mental suffering and its non linear and chaotic aspects Zen Buddhism on the other hand encourages access to reality and so this book will explore scientifically the ways in which it s guiding principles can be deployed to support and enhance Western clinical solutions to mental strife Movement of knowledge Kristofer Hansson,Rachel Irwin,2020-11-20 Medical knowledge is always in motion It moves from the lab to the office from a press release to a patient from an academic journal to a civil servant s desk and then on to a policymaker These movements matter value judgements on the validity of certain forms of knowledge determine the direction

of clinical research and policy decisions are taken in relation to existing knowledge The complexity of medical information and its wider effects is the focus of *Movement of knowledge* The authors address the pervasive influence of knowledge in medical and public health settings and scrutinize a range of methodological and theoretical tools to study knowledge They take a multidisciplinary approach to the medical humanities presenting both contemporary and historical perspectives in order to explore the borderlands between expertise and common knowledge Medical knowledge is deconstructed reconstructed and transformed as it moves between patients health providers and society at large The acceptance or rejection of treatment protocols based on medical facts has a fundamental impact on us all      **Artificial Intelligence in**

explores the profound impact of human thought and belief systems on our perceptions behaviors and the global state of disorder At its core it critiques how humans mis think arguing that our fragmented belief driven thought processes prevent us from perceiving reality as it truly is Drawing from philosophy neuroscience and psychology the text identifies six key misconceptions including our beliefs in linear time individuality and self improvement as barriers to achieving clarity and authentic presence The author emphasizes the need for a radical shift in how humans think advocating for a state of being here and now as a dynamic state rather than striving for a future ideal or clinging to past experiences The work challenges readers to question their assumptions confront the biases shaped by culture and memory and embrace a coherent and adaptive system of thought Rich with insights into the nature of perception the influence of thought on reality and the limitations of belief the document is a thought provoking call to action It invites readers to move beyond their conditioned reflexes and awaken their potential by embracing clarity flexibility and a deeper understanding of existence      Growth
