Poor's Manual of Industrials; Manufacturing, Mining and Miscellaneous Companies ,1916 **The Investor's Monthly Manual** ,1877 *Rethinking Investor-State Arbitration* Flavia Marisi, 2023-10-18

A significant increase in investor State arbitration cases has been observed since the 2000s. The trust placed by investors and States in this method of dispute resolution stems from several strengths. In addition to its neutrality, one of the primary reasons for its widespread use is its adaptability, enabling it to address specific challenges that have emerged in recent decades. The following elements highlight this adaptability: the arbitration procedure can be customised to meet the specific needs of the disputing parties and stakeholders involved; it effectively responds to evolving cultural norms and ethical considerations such as diversity, gender representation, corporate social responsibility, environmental issues, and human rights. Moreover, it can adapt to global health crises by facilitating online hearings. Finally, during times of international armed conflict, economic exchanges, trade investment, and investor State dispute settlement foster economic integration and interdependence, contributing to maintaining commercial peace and supporting international peace and security. However, investor State arbitration has sparked vigorous debates, with many advocating for reform in three crucial aspects: transparency, legitimacy, and consistency. Multilateral negotiations are currently underway on various fronts, including the negotiation of more sustainable investment treaties, amendments to institutional arbitral rules, the design of a multilateral investment court, and the development of enhanced policy frameworks. This book delves into the history of investor State dispute resolution to provide readers with an understanding of how its main features have evolved over time. It examines the most intensely debated procedural issues, analyses their multifaceted characteristics, reviews the complex relationship between investor State arbitration and the European Union, and explores potential options for addressing stakeholder concerns.

This first conference proved to be a resounding success and confirmed that Chile, in particular, and South America, in general, were indeed ideal for the Institution in the pursuit of its objective of disseminating information related to the international minerals industry. In relation to South America, the Chilean conference was followed in 1988 by that entitled Silver exploration, mining, and treatment, which was
