

**MARK SCHEME for the May/June 2014 series**

**0607 CAMBRIDGE INTERNATIONAL MATHEMATICS**

**0607/41**

Paper 4 (Extended), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

From Construction Materials to Technical Gases Rainer Pöttgen, Thomas Jüstel, Cristian A. Strassert, 2022-12-05 Many elements and inorganic compounds play an extraordinary role in daily life for numerous applications e.g. construction materials, inorganic pigments, inorganic coatings, steel, glass, technical gases, energy storage and conversion materials, fertilizers, homogeneous and heterogeneous catalysts, photofunctional materials, semiconductors, superconductors, soft and hard magnets, technical ceramics, hard materials or biomedical and bioactive materials. The present book is written by experienced authors who give a comprehensive overview on the many chemical and physico-chemical aspects related to application of inorganic compounds and materials in order to introduce senior undergraduate and postgraduate students, chemists, physicists, materials scientists, engineers into this broad field. Volume 1 covers construction materials, coatings, metals, intermetallics, technical glasses and technical gases. Vol. 2: From Energy Storage to Photofunctional Materials. Vol. 3: From Magnetic to Bioactive Materials. **War at the Speed of Light** Louis A. Del Monte, 2021-03 War at the Speed of Light explores the revolutionary role of directed energy weapons in warfare and their threat to disrupting the doctrine of Mutually Assured Destruction. *Wtf? Where's the Fraud?* Larry Benson, Andy Bucholz, 2015-12-27 WTF Where's the Fraud? How to Unmask and Stop Identity Fraud's Drain on Our Government reveals the true epidemic facing our nation: the profiles of its perpetrators and the devastating cost of this multi-billion dollar industry. Larry Benson and Andy Bucholz marshal their experiences at LexisNexis Risk Solutions as researchers and developers of solutions for identity theft and fraud. WTF Where's the Fraud explains identity fraud and answers the questions: Why should I care? and How much does it cost us? It reveals the information gold mine that perpetrators already know about and take advantage of. It sheds light on the growing insecurity of the government's benefits administration and points to the emerging problems of fraud in health care. This book gives both government and citizen alike a leg up against an unwieldy and adaptive enemy. In a time when social media pervades popular culture and ubiquitous devices provide easy access to personal information, identity fraud has emerged as a national epidemic.

International Plant Proteomics Organization (INPPO) World Congress 2014 Joshua L. Heazlewood, Jesús V. Jorrín-Novo, Ganesh Kumar Agrawal, Silvia Mazzuca, Sabine Luthje, 2017-02-08 The field of proteomics has advanced considerably over the past two decades. The ability to delve deeper into an organism's proteome, identify an array of post-translational modifications and profile differentially abundant proteins has greatly expanded the utilization of proteomics. Improvements to instrumentation in conjunction with the development of these reproducible workflows have driven the adoption and application of this technology by a wider research community. However, the full potential of proteomics is far from being fully exploited in plant biology and its translational application needs to be further developed. In 2011 a group of plant proteomic researchers established the International Plant Proteomics Organization (INPPO) to advance the utilization of this technology in plants as well as to create a way for plant proteomics researchers to interact, collaborate and exchange

ideas The INPPO conducted its inaugural world congress in mid 2014 at the University of Hamburg Germany Plant proteomic researchers from around the world were in attendance and the event marked the maturation of this research community The Research Topic captures the opinions ideas and research discussed at the congress and encapsulates the approaches that were being applied in plant proteomics **The Innocence of Pontius Pilate** David Lloyd Dusenbury,2021-12-01 The gospels and ancient historians agree Jesus was sentenced to death by Pontius Pilate the Roman imperial prefect in Jerusalem To this day Christians of all churches confess that Jesus died under Pontius Pilate But what exactly does that mean Within decades of Jesus death Christians began suggesting that it was the Judaeen authorities who had crucified Jesus a notion later echoed in the Qur an In the third century one philosopher raised the notion that although Pilate had condemned Jesus he d done so justly this idea survives in one of the main strands of modern New Testament criticism So what is the truth of the matter And what is the history of that truth David Lloyd Dusenbury reveals Pilate s innocence as not only a neglected theological question but a recurring theme in the history of European political thought He argues that Jesus interrogation by Pilate and Augustine of Hippo s North African sermon on that trial led to the concept of secularity and the logic of tolerance emerging in early modern Europe Without the Roman trial of Jesus and the arguments over Pilate s innocence the history of empire from the first century to the twenty first would have been radically different **Encounters** John C. Kennedy,2015-05-01 Part anthropological history part informed critique Encounters examines the relations between the people of southeastern Labrador and the many visitors who have come to fish heal the sick and extract the region s resources John Kennedy presents the latest archaeological genealogical and ethno historical research that changes scholarly understandings of southeastern Labrador Departing from the conventional view that coastal Labrador has distinct Inuit and non Inuit regions he argues that the coast should be viewed as a continuum of Inuitness Encounters unravels the social implications of the region s complex mercantile fishery describes how twentieth century military and resource development have impacted Labrador s seasonal economy and suggests that Newfoundland continues to use Labrador as a colony Kennedy uses field research he conducted in 2013 to describe the origins current economies and future challenges of the region s tiny villages Although he is a strong supporter of Aboriginal land claims Kennedy explores the impact of identity politics in the region showing how land claims based solely on geography can unintentionally create inequities Drawing on decades of field and archival research Kennedy demonstrates how Aboriginal politics are transforming society in southeastern Labrador empowering local people to overcome the stigmas of history and finally acknowledge their Inuit ancestry **Disabling Migration Controls** Rebecca Yeo,2024-06-10 When people are prevented from meeting their needs the impact is disabling whether in the immigration system or in the wider population Drawing on many years of research and activism this book argues that insights from the disabled people s movement particularly the original Social Model of Disability can be usefully extended to focus resistance on the disabling restrictions imposed on people subject to asylum and immigration controls While acknowledging the pain

and discomfort of many impairments and of forced displacement the book focuses on injustices that can be changed It does not catalogue the hostility of the hostile environment Nor does it promote inclusive asylum restrictions An unjust system is not transformed by including disabled people Policies designed to deprive people of essential needs and to stoke hatred among the wider population are core elements of the rise of fascism In this context bringing together movements for disability and migrant justice could help build urgently needed solidarity and resistance with which to develop a society based on equity and common humanity Quotations and images are used to convey the messages and priorities of disabled people seeking asylum ensuring that the book is both engaging and grounded in the insights of lived experience This book will interest people seeking to improve social justice including scholars of disability migration sociology and politics **Sick and Tired** Stephanie Premji,2019-01-09T00:00:00Z Bringing together a multidisciplinary group of experts from the fields of labour studies public health ergonomics epidemiology sociology and law Sick and Tired examines the inequalities in workplace health and safety Using an anti oppressive framework chapters interrogate a wide range of issues including links between precarious employment and mental health the inverse relationship between power and occupational health through the experiences of women immigrants and older workers and the need for creative strategies that promote health and safety in ways that support empowerment and equity **Revealing Schemes** Scott Radnitz,2021-05-18 Conspiracy theories are not just outlandish ideas They can also be political weapons Conspiracy theories have come to play an increasingly prominent role in political systems around the world In Revealing Schemes Scott Radnitz moves beyond psychological explanations for why people believe conspiracy theories to explore the politics surrounding them placing two questions at the center of his account What leads regimes to promote conspiracy claims And what effects do those claims have on politics and society Focusing on the former Soviet Union a region of the world where such theories have long thrived he shows that incumbent politicians tend to make conspiracy claims to demonstrate their knowledge and authority at moments of uncertainty and threat They emerge more often where there is serious political competition rather than unbridled autocracy and in response to events that challenge a regime s ability to rule Yet conspiracy theories can also be habit forming and persist as part of an official narrative even where immediate threats have subsided a strategy intended to strengthen regimes but that may inadvertently undermine them Revealing Schemes explores the causes consequences and contradictions of conspiracism in politics with an original collection of over 1 500 conspiracy claims from across the post Soviet region two national surveys and 12 focus groups At a time of heightened distrust in democratic institutions and rising illiberal populism around the world understanding how conspiracy theories operate in a region where democracy came late or never arrived can be instructive for concerned citizens everywhere **EAMCET PHYSICS English Medium** VIKRAM BOOKS,2015-09-18 EAMCET PHYSICS ENGLISH MEDIUM BIT BANK Prepared as per Latest Intermediate Changed Syallabus of Academic Year 2012 13 first year 2013 14 second year Bit Bank 6 Model Papers Previous EAMCET 2014 Paper **From What Is to What If** Rob

Hopkins,2019-10-15 Big ideas that just might save the world The Guardian The founder of the international Transition Towns movement asks why true creative positive thinking is in decline asserts that it s more important now than ever and suggests ways our communities can revive and reclaim it In these times of deep division and deeper despair if there is a consensus about anything in the world it is that the future is going to be awful There is an epidemic of loneliness an epidemic of anxiety a mental health crisis of vast proportions especially among young people There s a rise in extremist movements and governments Catastrophic climate change Biodiversity loss Food insecurity The fracturing of ecosystems and communities beyond it seems repair The future to say nothing of the present looks grim But as Transition movement cofounder Rob Hopkins tells us there is plenty of evidence that things can change and cultures can change rapidly dramatically and unexpectedly for the better He has seen it happen around the world and in his own town of Totnes England where the community is becoming its own housing developer energy company enterprise incubator and local food network with cascading benefits to the community that extend far beyond the projects themselves We do have the capability to effect dramatic change Hopkins argues but we re failing because we ve largely allowed our most critical tool to languish human imagination As defined by social reformer John Dewey imagination is the ability to look at things as if they could be otherwise The ability that is to ask What if And if there was ever a time when we needed that ability it is now Imagination is central to empathy to creating better lives to envisioning and then enacting a positive future Yet imagination is also demonstrably in decline at precisely the moment when we need it most In this passionate exploration Hopkins asks why imagination is in decline and what we must do to revive and reclaim it Once we do there is no end to what we might accomplish From What Is to What If is a call to action to reclaim and unleash our collective imagination told through the stories of individuals and communities around the world who are doing it now as we speak and witnessing often rapid and dramatic change for the better

*How Salmonella infection can inform on mechanisms of immune function and homeostasis* Constantino López-Macías,Adam Cunningham,2016-04-12 The use of model antigens such as haptens and ovalbumin has provided enormous insights into how immune responses develop particularly to vaccine antigens Furthermore these studies are overwhelmingly performed in animals housed in clean facilities and are not known to have experienced overt clinical signs caused by infectious agents Therefore this is unlikely to reflect the impact more complex host pathogen interactions can have on the host nor the diversity in how immunity is regulated Humans develop immune responses in the context of the periodic exposure to multiple pathogens and vaccines over a life time These are likely to have a long lasting effect on who and what we are and how we respond to further antigen challenge Therefore studies on how infection influences immune homeostasis and how the development of responses to a pathogen reflects what is known on immune regulation will be informative on how we can translate findings from our standard models into treatments usable in humans One organism allows us to do just this Bacteria of the genus Salmonella are devastating human pathogens Nevertheless many aspects of the diseases they

cause can be successfully modelled in murine systems so that the infection is either resolving or non resolving This has the advantage of allowing the long term impact of infection on immune function to be assessed We propose to welcome key workers to write about their research that examine the consequence of Salmonella infection on the host and the elements of the bacterium that contribute to this

**The Political Economy of Electricity** Mark Cooper,2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today s electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach

**Calder: The Conquest of Space** Jed Perl,2020-04-14 The concluding volume to the first biography of one of the most important influential and beloved twentieth century sculptors and one of the greatest artists in the cultural history of America is a vividly written illuminating account of his triumphant later years The second and final volume of this magnificent biography begins during World War II when Calder known to all as Sandy and his wife Louisa opened their home

to a stream of artists and writers in exile from Europe In the postwar decades they divided their time between the United States and France as Calder made his first monumental public sculptures and received blockbuster commissions that included Expo 67 in Montreal and the 1968 Olympics in Mexico City Jed Perl makes clear how Calder s radical sculptural imagination shaped the minimalist and kinetic art movements that emerged in the 1960s And we see as well that through everything their ever expanding friendships with artists and writers of all stripes working to end the war in Vietnam hosting riotous dance parties at their Connecticut home seeing the mobile Calder s essential artistic invention find its way into Webster s dictionary Calder and Louisa remained the risk taking singularly bohemian couple they had been since first meeting at the end of the Roaring Twenties The biography ends with Calder s death in 1976 at the age of seventy eight only weeks after an encyclopedic retrospective of his work opened at the Whitney Museum in New York but leaves us with a new clearer understanding of his legacy both as an artist and a man

*Advertising and Consumer Culture in Ireland, 1922-1962* Stephanie Rains,2022-08-13 This book explores advertising and consumer culture as key aspects of everyday life and national culture in twentieth century Ireland It makes a particular argument that the presence of anti materialist rhetoric in some parts of Irish public life after Independence has obscured the existence of a lively consumer culture throughout the period as

evident in the many advertisements which supported Irish newspapers and magazines the jingles broadcast on Irish radio and the neon advertising signs and billboards on Irish streets The book focuses on the development of the advertising industry itself and the sophisticated ways in which it worked to associate consumption with national pride It also considers the advertising of Irish homes and home appliances as an important focus of consumption and the targeting of Irish women as the principal consumers in those homes as well as publicity stunts and advertising in public space and the form and style of commercial broadcasting and sponsored programming from the earliest days of Irish radio It finishes with an examination of the opposite extremes of consumer abundance displayed in the annual Christmas advertising as opposed to the consumer culture response to shortages during World War Two
