Failing Our Future Joshua R. Eyler, 2024-08-27 An indictment of the grading system in American schools and colleges and a blueprint for how we can change it One of the most urgent and long standing issues in the US education system is its obsession with grades In *Failing Our Future* Joshua R Eyler shines a spotlight on how grades inhibit learning cause problems between parents and children amplify inequities and contribute to the youth mental health crisis Eyler who runs the Center for Excellence in Teaching and Learning at the University of Mississippi illustrates how grades interfere with students intrinsic motivation and perpetuate the idea that school is a place for competition rather than discovery Grades force students to focus on rewards and distract them from exploring ideas or

pursuing interests beyond what they'll be tested on. In fact, grades significantly impede the learning process. They are also significantly affecting children's physical, emotional, and psychological well-being. Rates of anxiety, depression, and suicidal ideation have spiked, and academic stress tied to grades is a leading cause of this escalation. Eyler shares success stories of grading reform efforts that are already under way as an antidote to the harms caused by the practices currently used in educational institutions. Equal parts scathing and hopeful, *Failing Our Future* aims to improve the lives of students by encouraging them to define success on their own terms. Parents, educators, policymakers, and students will find in these pages a rallying cry for change and a blueprint for how to implement reforms in our homes and classrooms. *Core EU Legislation 2022-23* Paul Drury, 2022-08-11 Well selected and authoritative. *Hart Core Statutes* provide the key materials needed by students in a format that is clear, compact, and very easy to use. They are ideal for use in exams. *GCSE Literature Boost: A Christmas Carol* Haili Hughes, 2024-07-05 *GCSE Literature Boost: A Christmas Carol* uses academic criticism and theory to relight your literary passion for this classic text and put a newfound excitement in your pedagogy. Beginning with a whistlestop tour of literary theory and criticism from 400BC to the late 20th century, Hughes explains how you can introduce your GCSE English students to themes most often reserved for undergraduate courses, improving their understanding of the text and broadening their knowledge of the subject as a whole. Written in easily digestible chunks, each chapter considers a main theme or section of *Charles Dickens A Christmas Carol* through different critical lenses, summarising the relevant academic theories and shows how you can transfer this knowledge to the classroom through practical teaching ideas. Features include Case studies showing how English teachers have used academic theory in practical ways. Ideas for teaching linked to GCSE assessment objectives at the end of each chapter. Six key points at the end of each chapter that highlight the key takeaways from that chapter. Real examples of student work which can be used as models and exemplars. This is essential reading for all secondary English teachers looking to create a climate of high expectations and improve their students' knowledge and understanding of the big ideas in literature. *Report Cards* Wade H. Morris, 2023-09-26 This book tells the story of American education by examining this unique element of student life. The author shows the evolution of how teachers, students, parents, and administrators responded to report cards. Report cards, he shows, were more than just a means by which a school documented each student's deportment, academic standing, and attendance. They were a tool of control, a microcosm for the changing power dynamics between teachers, parents, and students. **Learning Standards and the Assessment of Quality in Higher Education: Contested Policy Trajectories** Jon Yorke, Lesley Vidovich, 2016-07-13 This book analyses accountability and quality policies relating to learning standards and examines their implications for assessment in higher education. Whilst primarily focusing on the Australian setting, this analysis is located within a broader frame of reference that includes the United Kingdom (UK), the United States of America (US), and the Organisation for Economic Cooperation and Development (OECD). Across these settings, comparative measures of learning have been seen as a policy solution to the

problem of proving quality in a globalised and increasingly competitive higher education market Comparative measures of learning depend on the specification of learning standards Learning standards attempt to articulate the capabilities expected of graduates and students achievement of these is determined through the practices of assessment carried out within institutions Quality policy learning standards and assessment practices all intersect within the broader umbrella of accountability with relevance to governments higher education providers employers parents and students The findings reported in this book highlight a number of policy influences including the rising demands for national and international comparative data on learning standards to compare quality and inform student choice in a globally competitive market

Air Passenger Rights Michal Bobek,Jeremias Adams-Prassl,2016-01-28 Regulation 261 2004 on Air Passengers Rights has been amongst the most high profile pieces of EU secondary legislation of the past years generating controversial judgments of the Court of Justice from C 344 04 ex parte IATA to C 402 07 Sturgeon The Regulation has led to equally challenging decisions across the Member States ranging from judicial enthusiasm for passenger rights to domestic courts holding that a Regulation could not be relied upon by an individual claimant or even threatening outright to refuse to apply its provisions The economic stakes are significant for passengers and airlines alike and despite the European Commission s recent publication of reform proposals controversies appear far from settled At the same time the Regulation should according to the Treaty have uniform direct and general application in all the Member States of the Union How then can this diversity be explained What implications do the diverging national interpretations have for the EU s regulatory strategy at large This book brings together leading experts in the field to present a series of case studies from 15 different Member States as well as the extra territorial application of Regulation 261 combined with high level analysis from the perspectives of Aviation law and EU law
