Mark Weisburd, 2015-11-20 Failings of the International Court of Justice critically examines the jurisprudence of the International Court of Justice Even though the legal instrument that establishes the Court provides that its judgments have no formal precedential value those judgments are treated as authoritative by international lawyers throughout the world In this book A Mark Weisburd argues that the Court's decisions are in a large minority of cases poorly reasoned and doubtful as a matter of law and therefore ought not to be accorded the deference they receive The book seeks to demonstrate its thesis by a careful review of the Court's errors It begins with an examination of the law that created and empowered the Court It then describes the body of law upon which the Court was intended to base its decisions and the mistakes in the arguments supporting the Court's drawing legal rules from other sources The book goes on to analyze in detail cases in which the Court has made serious legal errors first addressing procedural errors then turning to mistakes in the application of substantive international law The book closes with a quantitative summing up of the Court's performance and a tentative explanation for its relatively disappointing record Narrating European Society Hans-Jörg Trenz, 2016-03-21 Trenz introduces a sociological perspective on European integration by looking at different accounts of Europeanization as society building He observes how Europeanization unfolds in ongoing practices and discourses through which social relations among the Europeans are redefined and re embedded The chapters describe how the project of European integration has been powerfully launched in postwar Europe as a normative venture that comprises polity and society building how this project became ingrained in every day life histories and experiences of the Europeans how this project became contested and confronted resistances and ultimately how it went through its most severe crisis A sociology of European integration is thus outlined along four main themes or narratives first

the elite processes of identity construction and the framework of norms and ideas that carries such a construction together with notions of European identity EU citizenship etc second the socialization of European citizens processes of banal Europeanism and social transnationalism through everyday cross border exchanges third the mobilization of resistance and Euroscepticism as a fundamental and collectively mobilized opposition to processes of Europeanization and fourth the political sociology of crisis linked not only to financial turmoil but also more fundamentally to a legitimation crisis that affects Europe and the democratic nation state
