

The Internal Combustion Engine

This partly cut-away view of a modern four-cylinder power unit illustrates most of the components. The main features can be quickly identified; the crankshaft which drives the camshaft through a double roller-chain, the pistons, valves and valve gear, the inlet and exhaust systems, and the oil pump which forces oil under pressure through an intricate system of oil-ways in the engine. The only items not shown are the coil-ignition distributor and the sparking plugs.
