Move from feeling anxious about the oil crisis to developing a positive vision and taking traction action to create a more self-reliant existence with this ground-breaking book We live in an oil-dependent world and have become reliant in a very short space of time using vast reserves of oil in the process and without planning for when the supply is not so plentiful Most of us avoid thinking about what happens when the oil runs out or becomes prohibitively expensive but the reality may not be as bad as we think The Transition Handbook shows how the inevitable and profound changes ahead could have a positive effect Written by permaculture expert Rob Hopkins he discusses the possibility of a rebirth of local communities which will generate their own fuel food and housing These will encourage the development of local currencies to keep money in the local area and unleash a local skilling up so that people have more control over their lives The growth in interest in the Transition model continues to be exponential There are now more than 35 formal Transition Initiatives in the UK including towns cities islands villages and peninsulas with more joining as the idea takes off With little proactivity at government level communities are taking matters into their own hands and acting locally If your community has not yet become a Transition Initiative this upbeat guide filled with beautiful black and white photographs offers you the tools to get started The Transition Handbook is the perfect manual to guide communities as they begin this energy descent journey *Computers Today & Tomorrow* □ 8 Manjeet Jauhar, Dorothy Fanthome, COMPUTERS TODAY TOMORROW series consists of eight computer science textbooks for classes 1-8 This series is created to help students master the use of various kinds of software and IT tools The books have been designed to keep pace with the latest technologies and the interests of the 21st century learners The series is based on Windows 7 and MS Office 2007 and adopts an interactive approach to teach various concepts related to Computer Science The books for classes 1-5 are introductory They introduce students to the basic features of Windows 7 and MS Office 2007 starting with the history of computers what are the basic parts of the computer how to use Tux Paint WordPad MS Paint how to program in LOGO and also give an introduction to the Internet However the books for classes 6-8 are for senior students and take a deep dive into the advanced features of Windows 7 and MS Office 2007 including how to do programming in QBasic HTML and Visual Basic Students learn to create animations using Flash and Photoshop and how to communicate using the Internet The ebook version does not contain CD *Speech Act Performance* Alicia Martínez Flor, Esther Usó Juan, 2010 Speech acts are an important and integral part of day-to-day life in all languages In language acquisition the need to teach speech acts in a target language has been demonstrated in studies conducted in the field of interlanguage pragmatics which indicate that the performance of speech acts may differ considerably from culture to culture thus creating communication difficulties in cross-cultural encounters Considering these concerns the aim of this volume is two-fold to deal with those theoretical approaches that inform the process of learning speech acts in particular contextual and cultural settings and secondly to present a variety of methodological proposals grounded on research-based ideas for the

teaching of the major speech acts in second foreign language classrooms This volume is a valuable theoretical and practical resource not only for researchers teachers and students interested in speech act learning teaching but also for textbook writers wishing to have an informed opinion on the pedagogical implications derived from research on speech act performance
