Revival: A History of Modern Culture: Volume II (1934) Preserved Smith, 2018-01-16. The understanding of history can be advanced only by the combination or alternation of analysis and synthesis. Detailed research and generalizing survey are not antiethical but complementary. For a long time, however, the specialist has reigned supreme in our schools. The need is now surely for a return to synoptic writing. The present work was undertaken to supply the need of a synthesis. It is a map of a large region, not a geological chart of a square mile or the plan of a single city. Its value, if any, lies in its view of the interrelations of large tracts of social and intellectual life, not in the intensive investigation of narrow fields.

Journal of Industrial Science ,1900 Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin,2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa
