2021 CHAPTER COMPETITION Sprint Round Problems 1–30

Name _____

DO NOT BEGIN UNTIL YOU ARE INSTRUCTED TO DO SO.

This section of the competition consists of 30 problems. You will have 40 minutes to complete all the problems. You are not allowed to use calculators, books or other aids during this round. Calculations may be done on scratch paper. All answers must be complete, legible and simplified to lowest terms. Record only final answers in the blanks in the left-hand column of the competition booklet. If you complete the problems before time is called, use the remaining time to check your answers.

In each written round of the competition, the required unit for the answer is included in the answer blank. The plural form of the unit is always used, even if the answer appears to require the singular form of the unit. The unit provided in the answer blank is the only form of the answer that will be accepted.

They deal with the adoption of new classes of technology used by individuals, organisations, sectors and society with a particular focus on how emerging technologies are adopted and appropriated in organisations and everyday life and their impact. Climate change is a planetary emergency. We have to do something now, but what? Saul Griffith has a plan. In *Electrify*, Griffith lays out a detailed blueprint, optimistic but feasible, for fighting climate change while creating millions of new jobs and a healthier environment. Griffith's plan can be summed up simply: electrify everything. He explains exactly what it would take to transform our infrastructure, update our grid and adapt our households to make this possible. Billionaires may contemplate escaping our worn-out planet on a private rocket ship to Mars, but the rest of us, Griffith says, will stay and fight for the future. Griffith, an engineer and inventor, calls for grid neutrality, ensuring that households, businesses and utilities operate as equals; we will have to rewrite regulations that were created for a fossil-fueled world, mobilize industry as we did in World War II and offer low-interest climate loans. Griffith's plan doesn't rely on big, not yet invented innovations but on thousands of little inventions and cost reductions. We can still have our cars and our houses, but the cars will be electric and solar panels will cover our roofs. For a world trying to bounce back from a pandemic and economic crisis, there is no other project that would create as many jobs: up to twenty-five million, according to one economic analysis. Is this politically possible? We can change politics along with everything else. **Army RD & A.**, 1970 Ecological Restoration for Protected Areas, 2012 **This is Malaŵi**, 1999 **Halting Biodiversity Loss** Great Britain. Parliament. House of Commons. Environmental Audit Committee, 2008 This is the thirteenth report from the Environmental Audit Committee of the 2007-08 session. HCP 743 ISBN 9780215524843 The Committee states that the Government will fail to meet the 2010 target to halt biodiversity loss, although the target might have been unrealistic. The Committee does see some progress, with 80% of Sites of Special Scientific Interest (SSIs) in a favourable condition, with a number of rare species having recovered. In general, though, biodiversity loss continues in the wider countryside, with many species and habitats facing severe declines and local extinctions. The Committee does believe, though, that with leadership and effective policies, biodiversity loss could in fact be reversed and states the Government should adopt a new target to halt the loss. Biodiversity policies need to be cross-departmental and the Government's ecosystem assessment is a way forward by encouraging such an

approach and promoting biodiversity protection at the regional and local scales The Committee further states that the Government could make a large contribution in preventing biodiversity loss through more support for the UK Overseas Territories Billboard ,1953-03-21 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends **Time** Briton Hadden, Henry Robinson Luce, 1953 Army RD & A Bulletin , 1971 **Modern Technologies Enabling**
