Kolen,Robert L. Brennan,2013-03-14 Test equating methods are used with many standardized tests in education and psychology to ensure that scores from multiple test forms can be used interchangeably In recent years researchers from the education psychology and statistics communities have contributed to the rapidly growing statistical and psychometric methodologies used in test equating This book provides an introduction to test equating which both discusses the most frequently used equating methodologies and covers many of the practical issues involved This second edition expands upon the coverage of the first edition by providing a new chapter on test scaling and a second on test linking Test scaling is the process of developing score scales that are used when scores on standardized tests are reported In test linking scores from two or more tests are related to one another Linking has received much recent attention due largely to investigations of linking similarly named tests from different test publishers or tests constructed for different purposes The expanded coverage in the second edition also includes methodology for using polytomous item response theory in equating The themes of the second edition include the purposes of equating scaling and linking and their practical context data collection designs statistical methodology designing reasonable and useful equating scaling and linking studies importance of test development and quality control processes to equating equating error and the underlying statistical assumptions for equating Given the perennial debates about academic standards and grade inflation it is my view that tools such as those described in this book should be adopted much more widely by the academic community than they are at present This book provides an excellent overview and I strongly recommend it Short Book Reviews of the ISI April2005 I highly recommend this book to everybody who has any interest in equating and linking be they a student practitioner or researcher Psychometrika 2006 **1972 Census of Selected Service Industries: Summary and subject statistics** United States.
