Year 9 Sats Papers:

How to be a Brilliant Trainee Teacher Trevor Wright, 2007-08-07 This cheerful and accessible book is packed with direct and straightforward advice drawn from the author's extensive and successful personal experience as teacher trainer, teacher and examiner. It sets out clear and practical guidelines to support your training and enhance your teaching, moving you directly towards a real understanding of how and why pupils learn and of how you can enhance your own progress. It also offers reassurance and support with the difficulties which you might encounter through your training as a teacher. Why won't Year 8 actually do anything? Why do we have to read all this theory? I know my pace and timing need improvement but what do I actually do about it? Why haven't I moved forward at all in the last four weeks? It does this by outlining strategies for organization, exploring issues of personal development, demystifying areas often seen as difficult or complex, providing achievable and practical solutions directly addressing anxieties. Although a practical book at its heart, it lies essential principles about good teaching and learning. It is anecdotal and readable and may be dipped into for innovative lesson ideas or read from cover to cover as a short enjoyable course which discovers exciting teaching principles in successful practical experience. The book is ideal for secondary trainee teachers but the underlying principles about what makes a brilliant trainee teacher are applicable to primary trainees too.

Get Ready to Teach Verity Lush, 2012-11-02

Learning to Teach English in the Secondary School Jon Davison, Jane Dowson, 1998 This forward-looking book combines theory and practice to present a broad introduction to the opportunities and challenges of teaching English in secondary school classrooms. Each chapter explains the background to current debates about teaching the subject and provides tasks, teaching ideas and further reading to explore issues and ideas in relation to school experience. With reference to new legislation, the chapters suggest a range of approaches to the teaching of reading, writing, speaking and listening, drama, media study, information technology, language study, grammar, poetry, Shakespeare, GNVQ and A Level English Language and Literature.

Learning to Teach English in the Secondary School offers principles and practical examples of teaching and learning in the context of the end of the twentieth century when new notions of literacy compete with the demands of national assessment. Taking as its starting point the changing ideologies of English as a subject, the text addresses questions about the nature of teacher education. It raises issues concerning competence-based courses, working with a mentor in school and monitoring the development of a student teacher.
