10. Why does Parris suggest calling Reverend Hale? *Betty's illness is caused by "unnatural causes" -he is trying to counter the rumor of his daughter's actions the night before)*
11. Why is Parris so upset with the girls? What did they do night before? *The girls were dancing naked in the woods. (inappropriate behavior for Puritans- also should not be in the forest where the devil lives)*
12. Why do you think Betty is **SCARED**? *Students should speculate that she is afraid of getting in trouble - because she knows what she has done is wrong.*
13. What is Reverend Parris most worried about? *His reputation.*
14. What sort of relationship does Parris and Abigail seem to have? *Not a good one-*

Consciousness Zoltan Torey, 2009-04-17 An interdisciplinary examination of the evolutionary breakthroughs that rendered the brain accessible to itself In *The Crucible of Consciousness* Zoltan Torey offers a theory of the mind and its central role in evolution He traces the evolutionary breakthrough that rendered the brain accessible to itself and shows how the mind boosted brain works He identifies what it is that separates the human's self reflective consciousness from mere animal awareness and he maps its neural and linguistic underpinnings And he argues controversially that the neural technicalities of reflective awareness can be neither algorithmic nor spiritual neither a computer nor a ghost in the machine The human mind is unique it is not only the epicenter of our knowledge but also the outer limit of our intellectual reach Not to solve the riddle of the self aware mind writes Torey goes against the evolutionary thrust that created it Torey proposes a model that brings into a single focus all the elements that make up the puzzle how the brain works its functional components and their interactions how language evolved and how syntax evolved out of the semantic substrate by way of neural transactions and why the mind endowed brain deceives itself with entelechy type impressions Torey first traces the language linked emergence of the mind the subsystem of the brain that enables it to be aware of itself He then explores this system how consciousness works why it is not transparent to introspection and what sense it makes in the context of evolution The consciousness revolution and the integrative focus of neuroscience have made it possible to make concrete formerly mysterious ideas about the human mind Torey's model of the mind is the logical outcome of this highlighting a coherent and meaningful role for a reflectively aware humanity
