**110013 13 6 2014 Paper Solution:**

*Contract, Status, and Fiduciary Law* Paul B. Miller, Andrew S. Gold, 2016-11-17 Contractual and fiduciary relationships are the two primary mechanisms through which the law facilitates coordinated pursuit of our personal interests. These fields are often represented in oppositional terms and many accept the distinction that contract law allows an individual to pursue their interests independently while fiduciary law allows an individual to pursue their interests in a dependent or interdependent way. Relying on this distinction however seems to suggest that the boundaries between the fields of contract and fiduciary law are fixed rather than fluid. Bringing together leading theorists to analyse critically important philosophical questions at the intersection of contract and fiduciary law *Contract Status and Fiduciary Law* demonstrates that popular characterizations of the relationship between contract and fiduciary law are overly simplistic. By considering how contract and fiduciary law interact and not just how they differ the contributors to this volume offer new insights into a range of topics including status relationships voluntary undertakings duties of loyalty equity employment law tort law the law of remedies political theory and the theory of the firm.
