### BRAKE SYSTEM WARNING LIGHT

The service brake system is a dual system designed so that one part will provide some

braking action in the event of loss of hydraulic pressure in the other part of the system. If the warning light labeled "BRAKE", located on the instrument panel, comes on and stays on when the

ignition is on and after the brakes have been firmly applied, it may indicate that there is a malfunction in one part of the brake system.

- As a reminder, the light is designed to come on with the parking brake applied and the ignition on.
- The light is also designed to come on during engine starting to verify that the bulb is operating properly.
- Have system repaired if light does not come on during check.
- This warning light is not a substitute for the visual check of brake fluid level required as part of normal maintenance.
