

## Animal Farm – Chapter 5

NB – The end of the first half of Chapter 5 is the most crucial turning point of all. At this point evil becomes **prevalent**. This is a time of crisis and tests of loyalty of the animals.

**Prevalent** – occurring more often.

### Summary of Chapter 5

As winter approaches, Mollie, the vain little mare, **“defects”** to the side of the humans. The animals plan the next season’s work, with Napoleon and Snowball in continual disagreement. Snowball creates a plan to build a windmill which could produce enough power and energy to do much of the animal’s work. He is on the point of winning the animals’ vote for the project, when Napoleon signals his bodyguard of nine fierce dogs to chase Snowball off the farm. Napoleon assumes sole command, abolishes meetings and later claims the idea of the windmill as his own.

**Defect** – in this context the word defect means to leave one’s home country in a way the home country claims to be illegal. The person is often seen as a traitor. Generally, it involves abandoning a person, cause, or doctrine to which one is bound by some tie.

### Analysis

The defection of Mollie marks her as an even greater materialist than she had appeared to be earlier in the novel. The fact that she is bribed away from Animal Farm with sugar and ribbons — two items that Snowball condemned as unnecessary for liberty in Chapter 2 — shows her desire for luxury without making the necessary sacrifices to obtain it. She is a defector from the politics of Animal Farm and is never mentioned by the other animals, who find her abandonment of Animalism and the rebellion shameful. Despite their implied condemnation, however, the pigeons do report that “She appeared to be enjoying herself” — much more so than the animals who remain on the farm. Mollie may be politically shallow in the eyes of her former comrades, but she does manage to secure herself a much more comfortable life, which raises the question of whether one is better off living well with one’s enemies or suffering with one’s comrades. The novel eventually suggests that Mollie did, in fact, make a wise decision in leaving Animal Farm, although (to be fair) she did not do so because of any political or moral motives.

**NB:** *George Orwell uses Mollie’s character to represent the wealthy who abandoned Russia to secure their personal safety in other countries.*

At this point, the pigs have gained more power. Earlier, they were “supervisors,” but now they decide “all questions of farm policy.” While these decisions still need to be ratified by the other animals, Orwell suggests that the pigs are gaining ground at a slow but steady rate. But with the “batterly hard weather” that arrives that winter, so do “batterly hard” debates increase between Snowball and Napoleon. Actually, “debate” is hardly the correct term, since only Snowball attempts to logically persuade away the other animals — Napoleon uses a number of what Squealer will later call “tactics” to get his way. For example, Napoleon spends time during the week training the sheep to break into their “Four legs good, two legs bad” bleating during “crucial moments” in Snowball’s speeches, packing the meetings with his own unwitting supporters is Napoleon’s calculated strategy here. His unleashing of the nine dogs later in the
