ALTERNATIVE PRESS INDEX, 2004 *Sailing with Noah* Jeffrey P. Bonner, 2013-06-03 Written by the president of the nation's number one zoo Sailing with Noah is an intensely personal behind the scenes look at modern zoos Jeffrey P. Bonner who was trained as an anthropologist and came to the zoo world quite by accident shares some of the most compelling stories ever told about contemporary zoos The stories jump between zoos in different cities and between countries on different continents Some are fun and funny Others are sad even tragic Pete Hoskins the director of the Philadelphia Zoo is in bed sound asleep when his phone rings There's been a fire in the World of Primates he is told You've got to get over here Whatever he has been dreaming it is nothing like the nightmare he will find now that he is awake They're all gone They're all gone All of the animals in the building the gorillas the lemurs the orangutans and the gibbons all twenty three of them are dead Written in a lively accessible style Sailing with Noah explores the role of zoos in today's society and their future as institutions of education conservation and research Along the way Bonner relates a variety of true stories about animals and those who care for them or abuse them offering his perspective on heavily publicized incidents and describing less well known events with compassion and humor in turn By bringing the stories of the animals lives before us

Bonner gives them a voice He strongly believes that zoos must act for living things and he argues that conservation is a shared responsibility of all mankind This book helps us to understand why biodiversity is important and what it means to be a steward of life on earth From the day to day aspects of caring for some of the world s most exotic creatures to the role of zoos as field conservation organizations saving wild things in wild places this book takes the reader on an incredible journey a journey that begins within the zoo and continues around the globe Everyone from zoo visitors to animal lovers to professional conservationists the young and old alike will be fascinated by this extraordinary book *Empty Hands, Open Arms* Deni Ellis Béchard, 2013-10-01 Absorbing B chard s masterful adventure driven reporting delivers an inspiring account of an all too rare ecological success story Booklist Bonobos have captured the public imagination due not least to their famously active sex lives Less well known is the fact that these great apes don t kill their own kind and that they share nearly 99% of our DNA Their approach to building peaceful coalitions and sharing resources has much to teach us particularly at a time when our violent ways have pushed them to the brink of extinction Animated by a desire to understand bonobos and learn how to save them Deni Ellis B chard traveled into the Congo Empty Hands Open Arms is the account of this journey Along the way we see how partnerships between Congolese and Westerners with few resources but a common purpose and respect for indigenous knowledge have resulted in the protection of vast swaths of the rainforest And we discover how small solutions found through openness humility and the principle that poverty does not equal ignorance are often most effective in tackling our biggest challenges Combining elements of travelogue journalism and natural history this incomparably rich book takes the reader not only deep into the Congo but also into our past and future revealing new ways to save the environment and ourselves Riveting and surprisingly uplifting David Suzuki author of *The Sacred Balance* The embodiment of the type of reporting that we dream of reading but all too rarely encounter intelligent engaged and above all astonishingly perceptive Dinaw Mengestu author of *The Beautiful Things That Heaven Bears* Also published as *Of Bonobos and Men* Reading Faces Edward Higgs, 2025-10-20 Reading Faces is the first book to discuss the historical contexts and theoretical underpinnings of the artificial intelligence AI systems that identify individuals or purport to ascribe emotions and characteristics to them based on their facial features It examines the direct impact of past research on the development of AI systems the way in which the past provides contexts which have predisposed people to accept outputs of AI systems as common sense how the role of politics and the changing nature of the state have led to the introduction of AI systems and their precursors how previous technologies led to the acceptance of the introduction of superficially similar AIs and how the outputs and biases such as purported associations between race and criminality of facial biometrics systems have been determined by the historical nature of the underlying datasets they analyze Reading Faces approaches these issues within the sweep of Western History how it has shaped conceptual categories about the application and ethics of AI and tried to foist those ideas and values on the Global South This book is essential reading for postgraduates scholars as well as non
