Ghanbarian, 2014-02-04 This monograph presents for the first time a unified and comprehensive introduction to some of the basic transport properties of porous media such as electrical and hydraulic conductivity air permeability and diffusion The approach is based on critical path analysis and the scaling of transport properties which are individually described as functions of saturation At the same time the book supplies a tutorial on percolation theory for hydrologists providing them with the tools for solving actual problems In turn a separate chapter serves to introduce physicists to some of the language and complications of groundwater hydrology necessary for successful modeling The end of chapter problems often indicate open questions which young researchers entering the field can readily start working on This significantly revised and expanded third edition includes in particular two new chapters one on advanced fractal based models and one devoted to the discussion of various open issues such as the role of diffusion vs advection preferential flow vs critical path universal vs non universal exponents for conduction and last but not least the overall influence of the experimental apparatus in data collection and theory validation The book is suitable for advanced graduate courses with selected problems and questions

appearing at the end of each chapter I think the book is an important work that will guide soil scientists hydrologists and physicists to gain a better qualitative and quantitative understanding of multitransport properties of soils Marcel G Schaap  
Soil Science Society of America Journal May June 2006      **Assessment in Practice** Alicia Curtin, Kevin Cahill, Kathy Hall, Dan O'Sullivan, Kamil Özerk, 2019-10-01 Assessment in Practice explores timely and important questions in relation to assessment By examining the relationship between identity culture policy and inclusion the book investigates the conflicted and fractured battleground of assessment and challenges current and practiced understandings of assessment practice The authors encourage the reader to reconceptualise assessment as a sociocultural practice Each chapter studies a key theme in the understanding of assessment policy and practice from a sociocultural perspective and provides questions to prompt reflection on the key assessment concepts outlined in the book Using culture as both a lens and analytic tool the chapters examine topics such as The social order of assessment how assessment works in the world and how learning could be assessed Perspectives on social justice and assessment with a particular focus on social class and other potential inequalities on the experiences of assessment for young people Discussions of ability and the assessment of students with special education needs as well as the role of inclusivity in assessment practice Written by leading academics from University College Cork the third volume in the successful Routledge Current Debates in Educational Psychology series is an essential read for researchers and postgraduate students in educational research and education psychology      A Student's Guide to Education Studies Stephen Ward, 2013-01-04 A Student's Guide to Education Studies is a much needed resource for any undergraduate making their first explorations into the fascinating world of education The first publication of this book in 2002 helped to define the nature of the subject introducing topics into the field which had not been previously considered This new edition brings the subject up to date with the latest thinking and research on policy globalisation learning and knowledge offering an accessible and wide ranging introduction to a diverse range of topics and issues in education Now fully updated to reflect rapid and significant changes in the field this third edition considers topical issues including the political dimension of education the national debate about schooling and poverty the marketisation of education the end of Every Child Matters the Coalition Government's policies for academies and free schools Organised around three enduring themes Education Policy and Politics Global and Environmental Education and Learning Knowledge and the Curriculum each chapter contains summary points questions for discussion and annotated suggestions for further reading With a distinctive international and global focus A Student's Guide to Education Studies is an essential resource for all students of Education Studies      **Databusting for Schools** Richard Selfridge, 2018-06-18 In the increasingly data swamped world of education data literacy is no longer a desirable skill it is essential Databusting for Schools is part guide through the complexities uses and limitations of data and part challenge to those who too readily make assumptions and draw conclusions This is an important book James Pembroke independent data analyst Data rules schools and ignorance is far from bliss From

assessment results to questioning educational claims there is a growing need to understand the numbers used in education Education data blogger and teacher Richard Selfridge aka Jack Marwood unravels the complexities of dealing with educational data and explains statistics in an understandable everyday way relevant to your classroom and your school He will take you through all you need to know about data and statistics in education including Where does education data come from The what why and how of numbers Understanding different types of graphs and how to use them How to play around with data to see the bigger picture How to interpret data does one thing really lead to another Using data to inform school policy A must read for all teachers school leaders data managers school governors and anyone in education who has ever looked at statistical data and broken out into a cold sweat Richard Selfridge is a primary school teacher and writer on education He is author of the popular datablog Icing on the Cake and tweets under the sometime pseudonym Jack\_Marwood

*Evidence Check 1* Great Britain. Parliament. House of Commons. Select Committee on Science and Technology, 2009 This report HCP 44 session 2009 10 ISBN 9780215542663 from the Science and Technology Committee looks at literacy programmes evidence check and concludes that expectations by the Department for Children Schools and Families of the quality of the evidence base for reading programmes are worryingly low It urges the Government to commission randomised controlled trials RCTs The Committee also states it is particularly concerned about the quality of evidence demonstrating cost effectiveness of different programmes and further recommends that the Government reviews its guidelines on RCT design it says even Wikipedia is more thorough and informative The Committee also concludes that the Government's focus on early literacy interventions and phonics based teaching is based on the best available evidence the use of Reading Recovery is based on a lower quality of evidence than the Committee is comfortable with and that the decision to introduce Reading Recovery nationally is not evidence based The Committee further expressed alarm that there was a complete lack of randomised controlled trials using standardised test scores for the Reading Recovery programme in the UK school system before national implementation of the programme

**Supporting Improving Primary Schools** Paul Lincoln, Geoff Southworth, 2005-06-27 Drawn from the experience of the Essex Primary School Improvement programme this book shows how primary schools in the county have improved their standards subsequent to OFSTED inspection It explores the role of the LEA in supporting schools and their efforts to improve It also looks at the collaborative relationship that LEAs and schools can form and the implications for school leadership and for students The book also sheds light on issues of consultancy information and data handling and evaluating school improvement

**Physics Of Nonlinear Optics** Guang S He, Song-hao Liu, 1999-12-29 Nonlinear optics has been a rapidly growing field in recent decades It is based on the study of effects and phenomena related to the interaction of intense coherent light radiation with matter Physics of Nonlinear Optics describes various major nonlinear optical effects including physical principles experimental techniques up to date research achievements and current or potential applications This book features clear conceptual descriptions concise formulations and

emphasizes both theoretical and experimental aspects of nonlinear optics The readability of this book is particularly enhanced by a series of color photographs showing the spectacular appearances of various nonlinear optical effects Both authors of this book are outstanding research scientists renowned in their professional areas Their major research achievements in nonlinear optics include the pioneering studies of two wave coupled refractive index change Raman enhanced self focusing optical frequency Pockels effect stimulated Kerr scattering optical phase conjugation via backward stimulated emission and two photon absorption based optical limiting stabilization and reshaping

**Scattering in Quantum Field Theories** Daniel Iagolnitzer, 2014-07-14 Axiomatic and constructive approaches to quantum field theory first aim to establish it on precise non perturbative bases general axioms and rigorous definition of specific theories respectively From the viewpoint of particle physics the goal is then to develop a relativistic scattering theory including particle analysis and the derivation of general properties of collision amplitudes Taking into account successive improvements this book provides a modern self contained and coherent presentation of important developments from the last twenty years most of which have not been treated or discussed in detail in earlier books These developments include in particular the axiomatic derivation in massive theories of general causal and momentum space analyticity properties of multiparticle collision amplitudes the constructive definition initially in the unphysical euclidean space of various models including non super renormalizable theories treated in the 1980s via phase space expansions and the subsequent constructive approach to scattering theory which provides information on the mass spectrum asymptotic completeness and multiparticle structure in increasingly higher energy regions Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
