

New section aluminum swingarm is lightweight and flex-resistant for great stability.

Larger-capacity air cleaner lets the engine breathe more easily for more power.

Tough, quick-shifting transmission (6-speed for RM125, 5-speed on RM250).

Aluminum flat-plate carburetor responds immediately for great acceleration.

Automatic exhaust control chamber means a wider powerband and less shifting.

With the powerful front disc brake you can slow deeper into corners.

Ultra-plush front forks soak up the rough so you don't have to.

Both the RM125 and RM250 share some significant technological advancements for 1988. First is their oval-section tubing frames which deliver astonishing rigidity in a tough lightweight design.

Next comes the new Full Floater rear suspension. This new design has eliminated a number of parts (for lighter weight) and now incorporates an eccentric-cam that delivers smoother, more

progressive action and a better overall ride and control.

Finally, the last major advancement is in the horsepower and powerbands. The new Suzuki engines now come with an automatic exhaust control system which places an exhaust chamber downstream of the exhaust port. The system uses a reliable, mechanically-actuated valve which opens at low and mid rpm to increase negative exhaust pressure for more bottom-end punch and mid-range acceleration. At high rpm the system's valve closes to produce high horsepower. The resulting powerband is incredibly wide and unbelievably potent.

New Full Floater with eccentric-cam action delivers a smooth ride.

With their flat-top piston designs and new automatic exhaust control chambers, the RM125 and RM250 motors deliver strong power at any rpm.
