infringement Aydin Turkgucu 2015 2017 Nobel Peace Prize Nominee *Global Brain Singularity* Cadell Last,2020-07-30

This book introduces readers to global brain singularity through a logical meditation on the temporal dynamics of the universal process Global brain singularity is conceived of as a future metasystem of human civilization that represents a qualitatively higher coherence of order To better understand the potential of this phenomenon the book begins with an overview of universal history The focus then shifts to the structure of human systems and the notion that contemporary global civilization must mediate the emergence of a commons that will transform the future of politics economics and psychosocial life in general In this context the book presents our species as biocultural evolutionary agents attempting to create a novel and independent domain of technocultural evolution that affords us new levels of freedom Lastly the book underscores the internal depths of the present moment structured by a division between subject and object The nature of the interaction between subject and object would appear to govern the mechanics of a spiritual process that is key to understanding the meaning of singularity inclusive of observers Given its scope the book will appeal to readers interested in systems approaches to the emerging world society especially historians philosophers and social scientists **Cultural**

Values in Strategy and Organization T. K. Das,2021-06-01 The field of strategy science has grown in both the diversity of issues it addresses and the increasingly interdisciplinary approaches it adopts in understanding the nature and significance of problems that are continuously emerging in the world of human endeavor These newer kinds of challenges and opportunities arise in all forms of organizations encompassing private and public enterprises and with strategies that experiment with breaking the traditional molds and contours The field of strategy science is also perhaps inevitably being impacted by the proliferation of hybrid organizations such as strategic alliances the upsurge of approaches that go beyond the customary emphasis on competitiveness and profit making and the intermixing of time honored categories of activities such as business industry commerce trade government the professions and so on The blurring of the boundaries between various areas and types of human activities points to a need for academic research to address the consequential developments in strategic issues Hence research and thinking about the nature of issues to be tackled by strategy science should also cultivate requisite variety in issues recognized for research inquiry including the conceptual foundations of strategy and strategy making and the examination of the critical roles of strategy makers strategic thinking time and temporalities business and other goal choices diversity in organizing modes for strategy implementation and the complexities of managing strategy to name a few This book series on Research in Strategy Science aims to provide an outlet for ideas and issues that publications in the field do not provide either expressly or adequately especially as regards the comprehensive coverage deserved by certain emerging areas of interest The topics of the volumes in the series will keep in view this objective to expand the research areas and theoretical approaches routinely found in strategy science the better to permit expanded and expansive treatments of promising issues that may not sufficiently align with the usual research coverage of

publications in the field Cultural Values in Strategy and Organization contains contributions by leading scholars on the role of cultural values in the field of strategy science research The 11 chapters in this volume cover the topics of ecological organizing and evolving cultural values corporate cultural responsibility cultural integration in mergers and acquisitions culture and paradoxical frames cultural values in the fair trade market national culture and legitimacy family businesses as values driven organizations cultural intelligence of executives building an alliance culture personal values of civil engineers and architects and cultural characteristics of Chilean and Brazilian workforces The chapters collectively present a wide ranging review of the noteworthy research perspectives on the role of cultural values in strategy and organization

Artificial Intelligence, Automation and the Future of Competence at Work Jon-Arild Johannessen, 2020-12-07 Artificial intelligence and the autonomous robots of the Fourth Industrial Revolution will render certain jobs and competences obsolete but will also create new roles which in turn require new sets of skills They will also transform how we produce distribute and consume as well as how we think Rather than a linear understanding of evolutionary processes we will develop a more interactive and circular interpretation This book offers a unique and holistic perspective on the future of work in the context of industry 4.0 It discusses the globalization of capital markets how artificial intelligence can help organizations to be more competitive and the new role of leadership in this technological landscape The author argues that there are four categories of competences which will be required in order to maintain the relevance of human skills and expertise in the innovation economy The new jobs that come into being will lend themselves to a particular set of skills General competences will be necessary for roles involving the 4Cs of communication creativity collaboration and change Specific or STEM competences will be called for across the science technology engineering and mathematics sectors Human competences will lend themselves to positions comprising the SELC framework of social emotional leadership and cultural skills Critical or REVE competences will be in demand for roles embracing reflection ethics values and the environment The book provides a human centric view of the current technological advancements of artificial intelligence and robotics and offers a positive outlook for human actors seeking continued relevance It will appeal to scholars and students of the innovation economy the knowledge society and the coming Fourth Industrial Revolution

That's Why We Are!.. How? We Are? Sam Zuker, 2025-08-12 That's Why We Are How We Are is a thought provoking novel that explores the contradictions of humanity our greatest triumphs and darkest failures From the historic Moon landing to the harsh realities of global suffering this journey spans from the late 1960s to the present day It challenges readers to confront what makes us who we are and how we became this way This book was born from a need to understand In that spirit I must be direct about the forces that have shaped my inquiry I dedicate this work to those who have shown me unwavering love and support and you will find their names here celebrated and cherished However it would be a disservice to the truth to ignore the contributions of my sister Shirley and my brother Jacobo To Shirley your greed has been a destructive tide but it has taught me the resilience of the human spirit to rise above

it To Jacobo your betrayal was a terrible blow but from it I have learned the fierce and necessary art of self reliance This book is a testament to the fact that we are not only shaped by the love we are given but also by the wounds we are forced to heal

Visions of Technological Transcendence James A. Herrick, 2017-03-03 This book examines key narratives animating the techno progressive rhetoric of the human enhancement movement arguing that enhancement and transhumanist discourse performs a variety of distinctly mythic functions Principal among these is to cast a vision of a technological future involving enhanced posthumans immortality human merger with machines and space colonization

Future Politics Jamie Susskind, 2018-09-12 Future Politics confronts one of the most important questions of our time how will digital technology transform politics and society The great political debate of the last century was about how much of our collective life should be determined by the state and what should be left to the market and civil society In the future the question will be how far our lives should be directed and controlled by powerful digital systems and on what terms Jamie Susskind argues that rapid and relentless innovation in a range of technologies from artificial intelligence to virtual reality will transform the way we live together Calling for a fundamental change in the way we think about politics he describes a world in which certain technologies and platforms and those who control them come to hold great power over us Some will gather data about our lives causing us to avoid conduct perceived as shameful sinful or wrong Others will filter our perception of the world choosing what we know shaping what we think affecting how we feel and guiding how we act Still others will force us to behave certain ways like self driving cars that refuse to drive over the speed limit Those who control these technologies usually big tech firms and the state will increasingly control us They will set the limits of our liberty decreeing what we may do and what is forbidden Their

algorithms will resolve vital questions of social justice allocating social goods and sorting us into hierarchies of status and esteem They will decide the future of democracy causing it to flourish or decay A groundbreaking work of political analysis Future Politics challenges readers to rethink what it means to be free or equal what it means to have power or property what it means for a political system to be just or democratic and proposes ways in which we can and must regain control
