

**UNIVERSITY OF MAINE SYSTEM  
ACADEMIC DEGREE: FULL PROGRAM PROPOSAL**

**I. Full Academic Degree Program Title**

**Master of Science: Spatial Informatics**  
University of Maine (CIP Code: 14.3801)

**II. Program Objectives**

The objective of this proposal is to provide an “all e-learning” “all coursework” master-of-science degree in Spatial Informatics (MSSI) for place-bound students that desire strong theory, computational, analytical, policy and technical foundations in geographic information science and systems. As a general rule, students may view class videos and accomplish assignments at any time throughout a week in any of the offered program courses and have the weekly opportunity (or requirement) to participate in a one to two hour “live” discussion session at a mutually convenient time for class members prior to the due dates for their weekly assignments. The MS Spatial Informatics graduate degree is an “online only” version of the existing and more intense on-campus research-focused *MS in Spatial Information Science and Engineering* degree. An innovative funding approach is used to ensure sustainability of the program and increase the potential for substantial financial benefits for the university.

**A. Program Rationale**

The business climate in Maine and the rest of the nation is characterized by rapid technological change, intense global competition, faster product life cycles and more complex, specialized markets. Individuals with information systems expertise who can design and develop information systems, manage sophisticated information resources, work on interdisciplinary teams and communicate effectively with business managers, engineers and other end-users are in short supply. A major goal of all the graduate programs in the School of Computing and Information Science is to produce individuals who can make significant contributions to economic development by ensuring that private and public enterprise have the expertise needed to remain competitive.

Already existing on-campus programs include the *Master of Science in Information Systems* (MSIS) and the *Graduate Certificate in Information Systems* (GC-IS) (<http://www.umaine.edu/msis/curriculum-and-degree-requirements/>) as well as the *Master of Science in Spatial Information Science and Engineering* (MS-SIE) and the *Graduate Certificate in Geographic Information Systems* (GC-GIS) (<http://spatial.umaine.edu/graduate-info/sie-graduate-info/>). Many of the courses affiliated with these programs are already offered with online class sections. This proposed graduate program will help us move to offering e-learning class sections for most of our non-research focused master’s level courses.

**How to Write a Research Paper: A Guide Book for Neophyte Students** Dr. Rashmee Yadav, 2023-02-14

**ABOUT THE BOOK** The book How to write a Research Paper Guide book for neophyte students composed by three youngsters Dr Rashmee Yadav Dr Brij Vikash Singh and Dr Mithesh Verma is a fantastic effort in this direction They have covered almost all the areas of research paper writing process and how to write a research paper etc The book is based on the research paper writing process The author s main focused on this book How to write a Research Paper Guide Book for the neophyte students This book is helpful to students writing research paper in proper way because plenty of research papers are written every year But in many of them research methodology aspect is not given a considerable attention and because of which the research papers end up in just being endless words containing stories leading to less or no sense It should be noted that the quality in research articles comes from the extensive planning and in depth research before starting writing them actually This is true even for management research papers writing A research paper analyzes a perspective or argues a point Regardless of the type of research paper the researcher is writing the researcher should present his own thinking backed up by others ideas and information Research paper as a result of the research in the teaching of writing discussions with colleagues and own experiences we have developed a detailed approach to writing research papers and the approach is presented here Instead of focusing on one research paper we have focused on the process of research writing through a series of shorter writing exercises Students begin by having to carefully think about a topic of research and by developing a working idea They then write a series of shorter essays that explore that topic All along the way students are continuing to research and revise their working proposal so that by the end of the term their thinking about their original topic of research has evolved This b

**Engineering Research** Herman Tang, 2020-12-18

Master the fundamentals of planning preparing conducting and presenting engineering research with this one stop resource Engineering Research Design Methods and Publication delivers a concise but comprehensive guide on how to properly conceive and execute research projects within an engineering field Accomplished professional and author Herman Tang covers the foundational and advanced topics necessary to understand engineering research from conceiving an idea to disseminating the results of the project Organized in the same order as the most common sequence of activities for an engineering research project the book is split into three parts and nine chapters The book begins with a section focused on proposal development and literature review followed by a description of data and methods that explores quantitative and qualitative experiments and analysis and ends with a section on project presentation and preparation of scholarly publication

Engineering Research offers readers the opportunity to understand the methodology of the entire process of engineering research in the real world. The author focuses on executable process and principle guided exercise as opposed to abstract theory. Readers will learn about an overview of scientific research in engineering including foundational and fundamental concepts like types of research and considerations of research validity. How to develop research proposals and how to search and review the scientific literature. How to collect data and select a research method for their quantitative or qualitative experiment and analysis. How to prepare present and submit their research to audiences and scholarly papers and publications. Perfect for advanced undergraduate and engineering students taking research methods courses. Engineering Research also belongs on the bookshelves of engineering and technical professionals who wish to brush up on their knowledge about planning preparing conducting and presenting their own scientific research.

**Action Research in Teaching and Learning** Lin Norton, 2009-05-07 A practical down to earth guide for those who work in teaching and learning in universities this book will be indispensable reading for those who would like to carry out action research on their own practice. Lin S Norton's concept of pedagogical action research has come from over twenty years experience of carrying out such research and more than six years of encouraging colleagues to carry out small scale studies at an institutional national and international level. This accessible text illustrates what might be done to improve teaching supporting learning by carrying out action research to address such questions such as What can I do to enthuse my students? What can I do to help students become more analytical? How can I help students to link theory with their practice? What can I do to make my lecturing style more accessible? What is going wrong in my seminars when my students don't speak? Action Research for Teaching and Learning offers readers practical advice on how to research their own practice in a higher education context. It has been written specifically to take the reader through each stage of the action research process with the ultimate goal of producing a research study which is publishable. Cognisant of the sector's view on what is perceived to be mainstream research the author has also written a substantial theoretical section which justifies the place of pedagogical action research in relation to reflective practice and the scholarship of teaching and learning.

**From Inquiry to Academic Writing** Stuart Greene, April Lidinsky, 2011-07-06 Academic writing is a conversation a collaborative exchange of ideas to pursue new knowledge. From Inquiry to Academic Writing A Text and Reader demystifies cross curricular thinking and writing by breaking it down into a series of comprehensible habits and skills that students can learn in order to join in. The extensive thematic reader opens up thought provoking conversations being held throughout the academy and in the culture at large. Read the preface.

**Quality Research Papers** Nancy Jean Vyhmeister, Terry Dwain Robertson, 2020-05-19 This will be the fourth edition of a time tested resource for students writing papers in the fields of religion and theology. It provides essential guidance for writing assignments typical in graduate programs in religion and has served as a standard textbook for seminary research courses. The fourth edition is updated to include information on Turabian 9th edition SBL Handbook 2nd

edition new resource lists and additional help with online resources and formatting issues Most importantly this new edition is revised from the perspective of information abundance rather than information scarcity Today s research mindset has shifted from find anything and be satisfied with anything to choose intentionally reliable and credible sources Quality Research Papers will guide students through an overabundance of online and library resources and help them craft excellent essays
