*Ability (Psychology Revivals)* Victoria Hazlitt, 2013-05-03 Originally published in 1926 the first part of this book attempted to formulate a theory of ability in the light of recent experimental results of the time It discusses the nature of intelligence and the problem of special abilities and includes a study of some typical forms of genius Victoria Hazlitt was a pioneer of experimental psychology which was particularly significant as a woman in the early twentieth century In many cases her work anticipated later developments in psychology by many years Today it can be enjoyed in its historical context *Ability*

Victoria Hazlitt, 2014-11 Originally published in 1926 the first part of this book attempted to formulate a theory of ability in the light of recent experimental results of the time It discusses the nature of intelligence and the problem of special abilities and includes a study of some typical forms of genius Victoria Hazlitt was a pioneer of experimental psychology which was particularly significant as a woman in the early twentieth century In many cases her work anticipated later developments in psychology by many years Today it can be enjoyed in its historical context

**Ability** Victoria Hazlitt, 2013-11-26 Originally published in 1926 the first part of this book attempted to formulate a theory of ability in the light of recent experimental results of the time It discusses the nature of intelligence and the problem of special abilities and includes a study of some typical forms of genius The second part gives an account of a three years experimental study of special abilities in arts and science respectively carried out upon university students Samples of the tests employed are included The results are presented in non technical form Victoria Hazlitt was a pioneer of experimental psychology which was particularly significant as a woman in the early twentieth century In many cases her work anticipated later developments in psychology by many years Today it can be enjoyed in its historical context

**The Structure of Human Abilities (Psychology Revivals)** Philip E. Vernon, 2014-01-27 First published in 1950 this revised edition of The Structure of Human Abilities was published in 1961 but remained largely unchanged from the original save for an additional supplement on the developments in factorial work on human abilities from 1950 1959 Much research had been carried out during the years leading up to publication in England and America into mental abilities and modern methods of statistical treatment especially factor analysis had been increasingly used It was felt that the mass of diverse material was apt to confuse the student of psychology of the time especially as the results of such research were often apparently conflicting Professor Vernon one of the leading experts in this branch of psychology sifted the material and attempted to provide a consistent picture of our mental structure

**Mental Life (Psychology Revivals)** Beatrice Edgell, 2014-04-08 Originally published in 1926 the aim of this textbook was the interpretation of human behaviour and conduct Beatrice Edgell is an important figure in the history of psychology She was the first British woman to receive a PhD in psychology the first female psychology professor in Britain and the first woman president of the British Psychological Society 1930 1931 of which she had been a founding member in 1901 As the Head of Psychology at Bedford College she established one of the first psychological laboratories in the UK She also taught a

number of women who went on to become prominent in the field One of her many publications this book was thought to be suitable for students training for social work or for the general reader interested in educational and social questions The Structure of Human Personality (Psychology Revivals) H. J. Eysenck, 2013-10-31 Originally published in 1953 this third edition was first published in 1970 It was one of the early attempts at bringing together theories of personality organisation and finding empirical evidence to test their hypotheses This third edition includes additional chapters and updated references to current research of the time It is a particular feature of this book that a large number of figures are reproduced in the text this is essentially a consequence of the writer's belief that diagrammatic representations are better suited to the transmitting and remembering of information than are words or numbers The first chapter outlines the theories and discusses some of their implications the second and third look at methods of analysis and projective techniques while the rest of the book is devoted to a critical presentation of the evidence arranged according to the technique employed rating self rating objective testing constitutional assessment autonomic measurement and so on Today it can be read and enjoyed in its historical context *Borderline (Psychology Revivals)* Peter Chadwick, 2013-12-16 Originally published in 1992 *Borderline* presents a unique study of the disturbed mind Professional psychologist Peter Chadwick draws upon his own personal experience of madness to provide a valuable exploration of the psychology of paranoia and schizophrenia The book goes beyond a narrowly focused analytical approach to examine schizophrenia from as many perspectives as possible Using participant observation introspection case study and experimental methods Chadwick shows how paranoid and delusional thinking are only exaggerations of processes to be found in normal cognition Impressed by the similarities between the thinking of mystics and psychotics he argues that some forms of madness are closely related to profound mystical experience and intuition but that these are expressed in a distorted form in the psychotic mind He explores the many positive characteristics and capabilities of paranoid patients providing a sympathetic account which balances the heavily negative constructions usually put on paranoia in the research literature *Borderline* provides many novel insights into madness and raises important questions as to how psychosis and psychotics are to be evaluated It will be essential reading for all practising professionals and students in clinical psychology and psychiatry and for everyone involved in the treatment understanding and management of schizophrenia *The Psychological Revival* United States. Bureau of Education, 1896

**Psychology in Africa (Psychology Revivals)** Mallory Wober, 2014-06-17 It is now well over a hundred and fifty years since the first celebrated geographical explorations of Africa took place However it was many years before there began quests of a different kind the investigation of behaviour personality attitude and ability among Africa's people Originally published in 1975 this book is an account of that work the first explorations in Africa of psychology In an exhaustive and well documented report the author a psychologist who had himself done research in Nigeria Uganda and who had lectured at Makerere University drew together the main threads of the research carried out so far putting the issues in an African

perspective but anchoring them firmly within the framework of modern psychological thinking and technique of the time Are there any common personality and intellectual characteristics among Africans How does weaning affect African child development How have Africans feelings developed about city life and industrial work The questions the author considers range from the broad based to the specific The challenges which lay ahead for African investigators then moving into the mainstream of the work are also discussed But perhaps above all the book made a convincing case for psychology becoming a relevant and finely honed discipline in Black Africa characterised by practical application to Black African society Each chapter covers a defined area of modern psychology of the time and presents a comprehensive survey in a language no more technical than the subject warrants At the time it was felt this book would be invaluable to students of Africa secondary education whose course included a psychology component and to African students beginning a degree course in psychology It would also have provided an informative supplement to courses in medicine development studies political science sociology and anthropology

**Revival: Medical Psychology and Psychical Research (1922)** Thomas Walker Mitchell, 2018-03-29 This book deals with those branches of Medical Psychology which have thrown most light on the problems of Psychical Research namely Hypnotism Hysteria and Multiple Personality The greater part of the contents had already been published in the forms of papers contributed to the Proceedings of the Society for Psychical Research between 1910 and 1922 when the book was first released

**Mutual Aid Universities (Routledge Revivals)** Eric Midwinter, 2014-10-03 First published in 1984 this collection of essays was the first account of the development of the University of the Third Age in Britain U3A Changing employment patterns and increasing pressure on traditional areas of secondary and higher education has led to the idea that learning can be a life long process The theories of U3As in Britain their development under the influence of European models and the major influences on them are analysed The authors argue that the consequences of social change and the economic social political sexual and racial inequalities that exist are often reinforced by the inequalities in our educational system A comprehensive title this book will be useful to any students with an interest in adult and continuing education

*REVIVAL OF ADVAITA, YOGA AND PANTHEISM IN AMERICA* Dr. George Joseph K PhD, 2015-12-10 There are reasonable symptoms of the weakening of the church and Christian faith in the USA and thereby the silent death American democracy and American Empire The vacuum created in the American mind by the secular humanism anti supernatural liberal theology and godless philosophies have prepared the fertile ground for the silent take over of USA by Islam Hinduism Advaita and yoga New Age religion legitimizes almost anything in the name of religion There is an explosion of sorcery The absolutely unwise philosophies like all is one man is God etc become widely accepted among the people New age psychology rejects the supernatural and God of the Bible but accepts the paranormal miracles of devil When the people begin to love the lie and hate the truth the future is bleak A strong democratic America would guarantee a better world But what if the whole nation is hypnotized into paranormal and abnormal by secular spiritualities

Revival: The Psychology of the Criminal

(1933) Maurice Hamblin Smith, 2018-05-08 This book is based upon twenty three years experience in local and convict prisons and more particularly upon the work done during the past three years with offenders from Courts in Birmingham and the adjacent districts The main object is to demonstrate how important is the thorough examination of the individual offender especially in regard to his mentality It is only by a great extension of this line of investigation that we can hope to solve the problems which criminality presents A considerable part of the book is devoted to that new development of psychology which is known as psycho analysis and to the possible applications thereof to the investigation and treatment of offenders The book includes a brief description of the theory and technique of psycho analysis so that the reader may not have to look elsewhere for an explanation of technical terms      Revival: Principles of Abnormal Psychology (1928) Edmund Smith Conklin, 2018-01-16 The literature since the first edition has been reviewed and material from it has been inserted with particular emphasis on experimental contributions Major additions are made in the sections on speech abnormalities constitutional psychopathic inferiority behavior effects of epidemic encephalitis and psychotherapy The chapters on psychoneuroses now precede those on the psychoses The revised work consists of 21 chapters and an index bibliographies are presented in footnotes and at the ends of chapters      Revival: Psychology and the Day's Work (1918) Edgar James Swift, 2018-04-17 Psychology considered as the science of human behavior is concerned with man's response to the impressions made upon him by objects people and events They make up the situations that he meets Behavior the individual's way of dealing with these situations if not a complete failure results finally in some sort of adjustment to the conditions in which one lives and this adjustment culminates in social and moral habits in habits of work in ways of thinking and acting in short in habits of life And through all the adapting process runs the influence of physiological conditions and the effect of their changes caused by the manner of life and the advance of years The adjustment may be mechanical and rigid insensible to misfits without power to readjust as conditions alter or again it may be flexible and adaptive capable of new adjustments as circumstances change This adjustment represents the capacity of man for achievement It is his efficiency the strategy and tactics of life It is well then from time to time to take an inventory of stock and try to discover the significance of the facts and principles of human behavior which investigation has revealed Concerning the more common matters of every day life however psychologists have offered relatively little of interpretative value Yet these experiences make up the day's work They determine its quantity and quality Much has been written about making others efficient but comparatively little about one's own method of thinking working and acting Yet knowing oneself reaches far into success and failure and there is no other way of understanding the behavior of others It is therefore in the hope of interpreting a few of these personal experiences of daily life that this book is written The topics that could be discussed extend far beyond the limits of a single volume The choice of course is largely personal but the writer has tried to select types of conduct as well as phases and causes of behavior that are fundamental to thinking and acting whether in the life of social intercourse or in the business and

professional world And after all thinking and acting determine achievement      **Revival: The New Psychology and Religious Experience (1933)** Thomas Hywel Hughes, 2018-01-16 Explores the crossover between the newly emerging field of psychology and the established doctrine of theology      *Announcements* Central State College (Edmond, Okla.), Central State Normal School (Edmond, Okla.), 1927      **International Histories of Psychological Assessment** Sumaya Laher, 2022-08-11 To look forward it is necessary to look back and learn History is more than just facts about the past it is a narrative told from a particular perspective A proverb from Africa Until lions have their own historians tales of the hunt shall always glorify the hunter captures this best Most of the scholarship about psychological assessment comes from very specific nationalities and cultures which does not truly reflect the diversity and breadth of histories pertaining to the field Covering 50 countries this collection gives voice to those that have previously been under represented and sometimes marginalized This book not only describes important moments in psychological assessment from around the globe but also equips readers with the tools to map the future of psychological assessment across nations It advocates for a more globally inclusive science of assessment that holds promise for enhancing creativity and innovation in the field      Organisational Behaviour Stephen Robbins, Timothy A. Judge, Bruce Millett, Maree Boyle, 2013-08-20 Robbins Leading the way in OB Organisational Behaviour shows managers how to apply the concepts and practices of modern organisational behaviour in a competitive dynamic business world Written and researched by industry respected authors this continues to be Australia s most popular text for introductory courses in organisational behaviour A new suite of learning and teaching resources that will excite future managers and inspire critical thinking accompanies the text      **The Australasian Journal of Psychology and Philosophy**, 1923
