Stanley, 2010-06-25 Real Science Real Life Presents a balanced Scientist Practitioner Educator approach to understanding Abnormal Psychology Several features distinguish this text from other textbooks currently available First the base of abnormal psychology rests on knowledge generated through scientific studies and clinical practice This text emphasizes this rich blend throughout Second it is increasingly clear that most forms of adult abnormal behavior either begin in childhood or have childhood precursors This text highlights what is known about the developmental trajectory of each condition Such a focus is instrumental in helping students gain some insight into the etiology of maladaptive conditions Third Beidel integrates biological findings with findings from social and behavioral sciences to foster the perspective that abnormal behavior is complex and subject to many different forces and highlight how

these variables often interact in a reciprocal fashion Fourth scientific findings with respect to race and gender are discussed with respect to each condition This includes a discussion of prevalence differences in symptom manifestation and any known etiological differences Importantly an effort is made to bring to life the nature of these conditions by providing vivid clinical descriptions In addition to short descriptions used liberally throughout each chapter a fully integrated case study is presented at the end of each chapter again illustrating the interplay of biological psychosocial and emotional factors Visit the Beidel preview website to view a sample chapter interview with the author reviewer quotes and much more www.pearsonhighered.com/showcase/beidel1e Find us on Facebook Login and search for Beidel Bulik Stanley Abnormal Psychology
