**Human Ethology** Irenaus Eibl-Eibesfeldt, 2017-07-28 With the discovery of conditioned reflexes by I P Pavlov the possibilities for experimenting following the example set by the classical exact sciences were made available to the behavioral sciences Many psychologists hoped that the component parts of behavior had also been found from which the entire multifaceted cosmos of behavior could then be constructed An experimentally oriented psychology subsequently developed including the influential school of behaviorism This first text on human ethology presents itself as a unified work even though not every area could be treated with equal depth For example a branch of ethology has developed in the past decade which places particular emphasis on ecology and population genetics This field known as sociobiology has enriched discussion beyond the boundaries of behavioral biology through its stimulating and often provocative theses After vigorous debates between behaviorists anthropologists and sociologists we have entered a period of exchange of thoughts and a mutual approach which in many instances has led to cooperative projects of researchers from different disciplines This work offers a biological point of view for discussion and includes data from the author s cross cultural work and research from the staff of his institute It confirms above all else the astonishing unity of mankind and paints a basically positive picture of how we are moved by the same passions jealousies friendliness and active curiosity The need to understand ourselves has never been as great as it is today An ideologically torn humanity struggles for its survival Our species does not know how it should compensate its workers and it experiments with various economic systems constitutions and forms of government It

**Bourgeois Equality** Deirdre Nansen McCloskey,2020-03-04 How standards of living have skyrocketed since 1800 and the political philosophy that made it possible Persuasive richly detailed and erudite Financial Times There s little doubt that most humans today are better off than their forebears Stunningly so the economist and historian Deirdre McCloskey argues in this concluding volume of her trilogy celebrating the oft derided virtues of the bourgeoisie The poorest of humanity McCloskey shows will soon be joining the comparative riches of Japan and Sweden and Botswana Why Most economists from Adam Smith and Karl Marx to Thomas Piketty say the Great Enrichment since 1800 came from accumulated capital McCloskey disagrees fiercely Our riches she argues were made not by piling brick on brick bank balance on bank balance but by piling idea on idea Capital was necessary but in the same way that oxygen is necessary for a fire Nor were institutions the drivers the World Bank orthodoxy of add institutions and stir hasn t worked McCloskey builds a powerful case for the initiating role of ideas ideas for electric motors and free elections of course but more deeply the bizarre and liberal ideas of equal liberty and dignity for ordinary folk Liberalism arose from theological and political revolutions in northwest Europe yielding a unique respect for betterment and its practitioners and upending ancient hierarchies Commoners were encouraged to have a go and the bourgeoisie took up the Bourgeois Deal and we were all enriched Few economists or historians write like McCloskey her ability to invest the facts of economic history with the

urgency of a novel or of a leading case at law is unmatched She summarizes modern economics and modern economic history with verve and lucidity yet sees through to the really big scientific conclusion Not matter but ideas Big books don t come any more ambitious or captivating than *Bourgeois Equality*      **The Lithic Assemblages of Qafzeh Cave** Erella

Hovers,2009-06-09 This book presents the first comprehensive description of the lithic assemblages from Qafzeh Cave one of only two Middle Paleolithic sites in the Levant that has yielded multiple burials of early anatomically modern Homo sapiens AMHs The record from this region raises the question of possible long term temporal overlap between early AMHs and Neanderthals For this reason Qafzeh has long been one of the pivotal sites in debates on the origins of AMHs and in attempts to compare and contrast the two species adaptations and behavior Although the hominin fossils from the site were published years ago until now the associated archaeological assemblages were incompletely described often leading to conflicting interpretations This monograph includes a thorough technological analysis of the lithic assemblages incorporated in their geological and sedimentological contexts This description serves as a springboard for regional comparisons as well as a more general discussion about Middle Paleolithic behavior which is relevant to important and as yet unresolved questions on the origins of modern behavior patterns The volume includes a wide ranging and up to date bibliography that provides the middle range for discussing the ecological context and behavioral complexity of the Middle Paleolithic period and ends with some thought provoking conclusions about the dynamic human interactions that existed in the region during this time
