Ecology of Tropical Rainforests Jayne T. MacLean,1985 **Ecology of Tropical Rainforests** Jane Potter Gates,1990

Human Activities and the Tropical Rainforest Bernard K. Maloney,1998 Arising initially from a conference the papers published here have been integrated into book form to provide information on human activities and the tropical rainforest in the past and present and on the possible future of the rainforest in a unique way Other books have considered some but not all of these themes however none has stressed the continuity of change over time and its possible outcome for the people of the forest as well as for the forest itself Because of the approach taken this book should appeal across traditional disciplinary boundaries Indeed a prime aim has been to suggest that rainforest because of its complexity and the complexity of people rainforest relationships throughout time deserves study from a broad perspective This book poses more questions than answers about the rainforest and it is hoped that it will encourage readers to think about the rainforest in a wider way than hitherto This book is aimed at geographers physical and human social anthropologists archaeologists pedologists foresters and tropical botanists and will be of value to graduates of various disciplines setting out to research the rainforest **In the Rainforest** Catherine Caufield,1985 Details of animal and plant life as well as the environmental vulnerability of the tropical rainforest of Central and South America Africa India Philippines and Indonesia **Tropical**

Rain Forests Richard T. Corlett, Richard B. Primack, 2011-03-03 The first edition of Tropical Rain Forests an Ecological and Biogeographical Comparison exploded the myth of the rain forest as a single uniform entity In reality the major tropical rain forest regions in tropical America Africa Southeast Asia Madagascar and New Guinea have as many differences as similarities as a result of their isolation from each other during the evolution of their floras and faunas This new edition reinforces this message with new examples from recent and on going research After an introduction to the environments and geological histories of the major rain forest regions subsequent chapters focus on plants primates carnivores and plant eaters birds fruit bats and gliding animals and insects with an emphasis on the ecological and biogeographical differences between regions This is followed by a new chapter on the unique tropical rain forests of oceanic islands The final chapter which has been completely rewritten deals with the impacts of people on tropical rain forests and discusses possible conservation strategies that take into account the differences highlighted in the previous chapters This exciting and very readable book illustrated throughout with color photographs will be invaluable reading for undergraduate students in a wide range of courses as well as an authoritative reference for graduate and professional ecologists conservationists and interested amateurs

Tropical Rain Forest Habitats Barbara Taylor, 2006-12-30 Describes various animals of the rain forest and where they live discussing species diets hunting defenses and life cycles and the structure of the ecosystem and also explores people of the rain forest and conservation

Tropical Rainforest Research — Current Issues D.S. Edwards, W.E. Booth, S.C. Choy, 1996-06-30 This volume contains 53 of the papers presented at the Conference on Tropical Rainforest Research Current Issues which was held in Brunei Darussalam in April 1993 The book provides an overview of current knowledge particularly with respect to south east Asia and is divided into three sections Biodiversity Forest Dynamics and Socioeconomics The Biodiversity section emphasises the vast range of life forms in tropical forests and considers the theory and practice of estimating species richness and spatial distribution while contributions on Forest Dynamics provide a better understanding of the maintenance of this species richness With an improved background of ideas on rainforest dynamics and biodiversity better management and conservation strategies are possible and some of these are explored in the papers on Socioeconomics The need to demonstrate the total worth of tropical forests to ensure their conservation is taken up by a number of contributors

Tropical Rainforests Susan E. Place, 1993-12 Like the first edition this revised and updated edition of Tropical Rainforests Latin American Nature and Society in Transition provides a variety of perspectives on the complex relationship between society and nature on the rainforest frontiers of Latin America Containing eleven new articles from experts in various fields and an updated introduction by the editor this book provides an overview of the complex issues of tropical deforestation both past and present
