Ashforth, Davide Ravasi, 2016-09-29 The topic of organizational identity has been fast growing in management and organization studies in the last 20 years Identity studies focus on how organizations define themselves and what they stand for in relation to both internal and external stakeholders Organizational identity OI scholars study both how such self definitions emerge and develop as well as their implications for OI leadership and change among others We believe there are at least four inter related reasons for the growing importance of OI OI addresses essential questions of social existence by asking Who are we and who are we becoming as a collective It is a relational construct connecting concepts and ideas that are often viewed as oppositional such as us and them or similar and

different OI is also a nexus concept serving to gather multiple central constructs also represented in this Handbook. The Corporatization of the Business School Tony Huzzard, Mats Benner, Dan Kärreman, 2017-04-21 With business schools becoming increasingly market driven, questionable trends have emerged such as the conflation of academic and corporate management and the notion that academics and students are market players who respond rationally to market signals. Using individual studies from leading scholars in a variety of disciplines and countries, this book identifies the global pressures behind these trends. It focuses on the debates surrounding the commercialization of business schools and the rise of different methods of measuring their success. In their unique approach, the authors and editors discuss the impact of the confrontation between the timeless values embodied by Minerva, the Roman goddess of Wisdom, and the hard realities of competition and corporatization in modern society. This book will be compelling reading for students and academics in critical management studies, organizational studies, public management, and higher education, as well as for stakeholders in academia and educational policy.

The Oxford Handbook of Phenomenologies and Organization Studies François-Xavier de Vaujany, Jeremy Aroles, Mar Pérezts, 2023 Phenomenologies are a major stream of philosophy. Our aim with this handbook is to explore critically and reflexively the plurality of phenomenologies and their becoming in the context of Management and Organization Studies. We detail in the introduction the genealogy of the phenomenological moment and make a distinction between four streams of phenomenologies: phenomenology as a phenomenological moment, post phenomenologies, anti phenomenologies, and non phenomenologies. Beyond many clichés about phenomenologies, we argue that phenomenologies cultivate critical perspectives, ontologies, and even for some of them, metaphysics that make them particularly interwoven with other philosophical traditions. We draw implications for Management and Organization Studies as a field.
