How to Restore Your Chevy Truck: 1947-1955 Deve Krehbiel, 2020-01-15. Everything you need to completely restore your 1947-1955 first series Chevy pickup to better than new condition is shown in complete detail. The Advance Design era 1947-1955 was historic for Chevrolet, topping all the production numbers every year they were in production. And for good reason: The post-World War II economy demanded a tough and well-engineered solution for this growing economy. Selling more than 2.5 million units during this era, Chevrolet quickly surpassed and controlled the light truck market with style, utility, and logical engineering. This era has been overlooked for long enough, and Deve Krehbiel, a well-known restoration expert from DevesTechNet.com who specializes in these trucks, puts his 40 years of experience restoring nothing but Advance Design trucks into an extensive and complete single volume. With more than 500 photos and detailed instruction for every aspect of a proper restoration, this book will be the restorer's best friend. Deve's companion book, *Chevrolet Inline 6 Engine 1929-1962 SA455*, explains in full detail the engine aspects of your project. The Advance Design Chevy pickup is one of the most popular and highly prized vehicles at any venue. The author's hope is that this book will give you the confidence and the knowledge to put your old Chevy truck back on the road in style. There is just nothing more interesting and more inviting than an old Chevy truck.

How to Chop Tops Tony Thacker, 2024-11-15. Learn how to chop tops with advice from the experts. Today, the purpose of a chopped top on a hot rod is mostly to make a visual statement, but that wasn't always the case. In the late 1930s, roadsters were considered to be real hot rods, while sedans and coupes were not considered to be race cars. Over time, sanctioning bodies began to accept sedans and coupes as race cars, which created the need for chopping tops. When competing in dry lake racing, the tall birdcages of cars that had not been chopped created an excessive amount of aerodynamic drag. Chopping the top increased the aerodynamic efficiency to the point that the coupes were competitive with the roadsters. Tops aren't often chopped for those reasons today. However, when viewing the works of art that have been created by the best chopping masters, it's clear that enhanced aesthetics is the only reason that is needed. Chopping a top may seem simple at first, especially if you think that old tops are mostly square, but it is not. The process of chopping a top severely alters the angles of the A-pillars, the intersections where metal meets at the C-pillars, and the rake and fitment of the
