**Two-stroke-cycle Diesel Engines** P. H. Schweitzer, Frank DeLuca, 1942 A convenient method has been developed for determining the scavenging efficiency or the charging efficiency of two stroke cycle engines The method consists of introducing a suitable tracer gas into the inlet air of the running engine and measuring chemically its concentration both in the inlet and exhaust gas Monomethylamine  $\text{CH}_3\text{NH}_2$  was found suitable for the purpose as it burns almost completely during combustion whereas the short circuited portion does not burn at all and can be determined quantitatively in the exhaust The method was tested both on four stroke and on two stroke engines and is considered accurate within 1 percent

**North American Indians in the Great War** Susan Applegate Krouse, 2007-01-01 More than twelve thousand American Indians served in the United States military in World War I even though many were not U S citizens and did not enjoy the benefits of enfranchisement Using the words of the veterans themselves as collected by Joseph K Dixon 1856 1926 North American Indians in the Great War presents the experiences of American Indian veterans during World War I and after their return home Dixon a photographer author and Indian rights advocate had hoped that documenting American Indian service in the military would aid the Indian struggle to obtain general U S citizenship Dixon managed to document nearly a quarter of the Indians who had served but was unable to complete his work and his records languished unexamined until now Unlike other sources of information on Indian military service collected by government officials Dixon s records come primarily from the veterans themselves Their comments reveal pride in upholding an Indian tradition of military service as well as frustration

with the U S government Particularly in its immediacy and individuality Dixon s documentation of American Indian veterans of World War I adds greatly to our understanding of the experiences of American Indians in the U S military Pigot and co.'s national commercial directory for 1828-9, comprising a directory of the merchants, bankers, professional gentleman [&c.] in the counties of Cheshire, Cumberland [&c.]. **Laws** Nils Jansen,Reinhard Zimmermann,2018-07-12 The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations After the collapse of the European Commission s plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law The present book adopts a broad perspective and an integrative approach All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other As far as the *acquis commun* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law *The New York Times Index* ,1929 *Scientific results of the second & third Oxford University expeditions to Spitsbergen in 1923 and 1924* ,1929 Collection of reprints of the results of the Oxford University expedition to Spitsbergen in 1921 1924 including ornithology glaciology geology and botany **Expeditions Unpacked** Ed
