### C13-9 (continued)

10. This is a change in accounting principle for which **FASB 154** requires a retrospective application. All prior periods, including prior interims, are restated to the new accounting principle (percentage-of-completion) for the direct effects of the change. This presumes that the company is able to determine the effects of the change on previous interim periods. Otherwise the company must wait until the first day of the next fiscal year to make the change.

11. This is a change in estimate and is treated currently and prospectively. Prior interims are not restated for this change in estimates. The change in estimate would be made effective as of the first day of the interim period in which the change is made.
