Ordaining Reality Made Easy Joseph E. Donlan, 2009 Many people believe in the Power of Positive Thinking but no one

has succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences To explain the connection this book presents a new paradigm of nature and couples it with a convincing explanation of how our right brain hemispheres have a unique ability to tap into the hidden domain of the metaphysical To support this premise the reader is lightly exposed to the divergent worlds of physics and metaphysics and is then introduced to a new view of nature that undeniably links mind to matter Important to its charge the new perspective makes the case that the future can only be created with thoughts In the final analysis the author brings his readers through the necessary steps to put this knowledge to work to help them create their own realities
