

Wall Mounting

1. Release the front assembly from the back case by depressing the two locking tabs at the top of the unit with the blade of a medium size screwdriver.
2. Separate the front and back case assemblies by rotating the front case so that it is perpendicular to the back case and unsnapping (releasing) the two hooks from the back case.
3. Feed the field wiring through the appropriate openings in the back case. Use tie-wraps to secure the wiring to the built-in wire loops as needed.
4. Mount the back case to a sturdy wall.
5. Attach the front and back cases by connecting the hooks on the front case to the attachments on the rear case. Once attached, the hooks will support the front case and allow you to make the wiring connections.
6. After all wiring connections have been made, snap the front case and back case closed and ensure that the control is secured by the locking tabs.
