

Work engagement, organizational commitment, and turnover intentions: A meta-analysis

David A. Gagne, Robert M. Grant, and Jeffrey R. Mayer

Abstract: This meta-analysis examined the relationships between work engagement, organizational commitment, and turnover intentions. The analysis included 100 studies with a total of 10,000 employees. Results showed that work engagement is positively related to organizational commitment and negatively related to turnover intentions. Organizational commitment is also positively related to work engagement and negatively related to turnover intentions. The relationship between work engagement and turnover intentions is mediated by organizational commitment. The analysis also found that work engagement is more strongly related to organizational commitment and turnover intentions in the private sector than in the public sector. The analysis also found that work engagement is more strongly related to organizational commitment and turnover intentions in the service industry than in the manufacturing industry. The analysis also found that work engagement is more strongly related to organizational commitment and turnover intentions in the United States than in other countries. The analysis also found that work engagement is more strongly related to organizational commitment and turnover intentions in the United States than in other countries.
