FEATURES

The Honda CB250 and CB350 are sports motorcycles designed for true sports riding. In addition to mounting a more powerful engine on the rugged lightweight frame, the new five speed transmission provides superb riding pleasure at high speed.

- The 4-cylinder air cooled engine with the two cylinders arranged vertically side-by-side is equipped with an overhead camshaft. This makes it possible to obtain superior engine performance over the entire speed range.
- Pressure feed for the lubrication system is provided by the plunger pump, with the lubricant being filtered by both screen and centrifugal filters. The high efficiency of the oil filter system greatly reduces the wear to the component parts of the engine.
- The use of the variable venturi carburetor makes possible smooth engine running and quick response.
- A combination of steel tubing and steel sheet are used for a well balanced design frame, giving lightness and high strength.
- The telescopic front suspension with a swing arm type suspension at the rear, both having longer strokes, provide greater riding comfort.
- Greater safety has been added by the mounting of larger turn signal lamps and taillight, making the motorcycle visible from a greater distance.
