

## SGO Exemplar: Mathematics, Grade 6

### Overview

This 6th grade mathematics teacher created his SGO to focus on the grade-level algebra content standards in order to prepare his students for continued success in this content strand throughout middle and high school. This SGO is aligned to the Common Core State Standards (CCSS) and uses several data points to determine each student's Progress/exit Group (Measures of Academic Progress, Previous Grade Final, and Diagnostic). The teacher's choice to focus on this specific content strand is acceptable as his endGP score will encompass student achievement on the broader grade-level content standards taught throughout the year.

Name	School	Grade	Course/Subject	Number of Students	Interval of Instruction
		6	Mathematics	68	9/14/21 to 4/29/22
<b>Standards, Rationale, and Assessment Method</b> Name the content standards covered, state the rationale for how these standards are critical for the next level of the subject, other academic disciplines, and/or life/career/careers. Name and briefly describe the format of the assessment method.					
<b>RATIONALE</b> This SGO focuses on the grade-level algebra content strand from the Common Core State Standards (CCSS), which includes all standards within the <i>Expressions and Equations</i> Domain for Grade 6. Algebraic thinking is a strand of mathematics that relies on a strong foundation built throughout elementary and middle school mathematics.  Throughout the <i>Expressions and Equations</i> Domain in Grade 6, students are required to (1) make connections between previous arithmetic understandings and algebraic representations, (2) write and solve equations and inequalities, and (3) represent relationships between variables. By focusing on these skills in Grade 6, student proficiency in algebraic thinking and skills is supported and will enable greater student achievement in their continued study of mathematics in high school. As argued by the National Council of Teachers of Mathematics (NCTM) in <i>Algebra as a Strand of School Mathematics for All Students</i> , students "[c]haracterizing algebra as a strand of the school curriculum highlights the power and usefulness of algebraic thinking and skills – proficiencies that open academic doors and are evident in many professions and careers. Such an algebra strand in the school curriculum is critical and is accessible for all students." The emphasis placed in grade 6 by this SGO will enable students to continue developing their understanding of this critical skill.					
<b>ASSESSMENT</b> The assessment of student learning in this SGO will be the Grade 6 Algebra Common Assessment created by the Grade 6 Team. The format of the 50 point assessment is: 10 Selected Response – Multiple Choice (1 point item), 10 Constructed Response (2 point items), and 2 Performance Tasks (10 point items). See attached Assessment Blueprint for details.					
<b>STANDARDS</b> The following Grade 6 CCSS are assessed in this SGO:					
<b>6.EE.2:</b> Write and evaluate numerical expressions involving whole-number exponents.					
<b>6.EE.2:</b> Write, read, and evaluate expressions in which letters stand for numbers.					
<b>6.EE.2a:</b> Write expressions that record operations with numbers and with letters standing for numbers.
