It walks readers through engaging with security challenges and building a safe infrastructure for IoT devices. The book helps researchers and practitioners understand the security architecture of IoT and the state of the art in IoT countermeasures. It also differentiates security threats in IoT-enabled infrastructure from traditional ad hoc or infrastructural networks and provides a comprehensive discussion on the security challenges and solutions in RFID and WSNs in IoT. This book aims to highlight the concepts of related technologies and novel findings by researchers through its chapter organization. The primary audience comprises specialists, researchers, graduate students, designers, experts, and engineers undertaking research on security-related issues.

Applied Quantitative Analysis in Education and the Social Sciences Yaacov Petscher, Christopher Schatschneider, Donald L. Compton, 2013-03-05. To say that complex data analyses are ubiquitous in the education and social sciences might be an understatement. Funding agencies and peer review journals alike require that researchers use the most appropriate models and methods for explaining phenomena. Univariate and multivariate data structures often require the application of more rigorous methods than basic correlational or analysis of variance models. Additionally, though a vast set of resources may exist on how to run analysis, difficulties may be encountered when explicit direction is not provided as to how one should run a model and interpret results. The mission of this book is to expose the reader to advanced quantitative methods as it pertains to individual level analysis, multilevel analysis, item level analysis, and covariance structure analysis. Each chapter is self-contained and follows a common format so that readers can run the analysis and correctly interpret the

Evolving Nationalism Nadav Gershon Shelef,2010 *Evolving Nationalism* examines how the idea of Israel as a nation state has developed within Zionist and Israeli discourse over the past eight decades Nadav G Shelef focuses on the changing ways in which the main nationalist movements answered three distinct questions in their private and public ideological articulations between 1925 and 2005 Where is the Land of Israel Who ought to be Israeli What should the Zionist national mission be Framed within broader debates about how and why changes in foundational definitions of the nation occur Shelef s analysis centers on the mechanisms of ideological change and then subjects them to empirical scrutiny He thus moves beyond the common but problematic assumptions that such transformations must be either a rare rational adaptation to traumatic shock or a relatively constant product of manipulation by power hungry elites He finds that nationalist movements including radical and religious fundamentalist ones can and do change cardinal components of their ideological beliefs in both moderating and radicalizing directions These changes have more to do with the unguided consequences of engagement in day to day politics than with strategic reaction to new realities the use of force or the changing incentives of leaders Engaging with some of the most contentious debates about the nature of Israeli nationalism and the geographic religious and ethnic definition of the state of Israel Shelef has made signal contributions to our understanding of Middle East politics and of the ideological underpinnings of nationalism itself
