Teaching Mathematics with Classroom Voting Kelly Slater Cline, Holly Zullo, 2012 Are you looking for new ways to engage your students? Classroom voting can be a powerful way to enliven your classroom by requiring all students to consider a question, discuss it with their peers, and vote on the answer during class. When used in the right way, students engage more deeply with the material and have fun in the process while you get valuable feedback when you see how they voted. But what are the best strategies to integrate voting into your lesson plans? How do you teach the full curriculum while including these voting events? How do you find the right questions for your students? This collection includes papers from faculty at institutions across the country teaching a broad range of courses with classroom voting, including college algebra, precalculus, calculus, statistics, linear algebra, differential equations, and beyond. These faculty share their experiences and explain how they have used classroom voting to engage students to provoke discussions and to improve how they teach mathematics. This volume should be of interest to anyone who wants to begin using classroom voting as well as people who are already using it but would like to know what others are doing. While the authors are primarily college-level faculty, many of the papers could also be of interest to high school mathematics teachers.

Comprehensive coverage of critical issues related to information science and technology. 14th International Conference on Computational Intelligence in Security for Information Systems and 12th International Conference on European Transnational Educational (CISIS 2021 and ICEUTE 2021) Juan José Gude Prego, José Gaviria de la Puerta, Pablo García Bringas, Héctor Quintián, Emilio Corchado, 2021-09-21. This book of Advances in Intelligent and Soft Computing contains accepted papers presented at CISIS 2021 and ICEUTE 2021 all conferences held in the beautiful and historic city of Bilbao Spain in September 2021. The aim of the 14th CISIS 2021 conference is to offer a meeting opportunity for academic and industry related researchers belonging to the various vast communities of computational intelligence information security and data mining. The need for intelligent flexible behavior by large complex systems especially in mission critical domains is intended to be the catalyst and the aggregation stimulus for the overall event. After a thorough peer review process the CISIS 2021 International Program Committee selected 23 papers which are published in these conference proceedings achieving an acceptance rate of 40%. In this relevant edition a special emphasis was put on the organization of special sessions. One special session is organized related to relevant topics as follows building trust in ecosystems and ecosystem components. In the case of 12th ICEUTE 2021 the International Program Committee selected 17 papers which are published in these conference proceedings. One special session is organized related to relevant topics as follows sustainable personal goals engaging students in their learning process. The selection of papers is extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the program committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference and the CISIS and ICEUTE conferences would not exist without their help.
