[Going Gradeless, Grades 6-12](#) Elise Burns, Elise B Naramore, David Frangiosa, 2021-02-23 Grade reform and standards based grading SBG is a hotly debated issue in education As one high school administrator puts it Traditional letter grading is probably the biggest elephant in the room in regard to school reform We start grading at a young age and it becomes all about accumulating points and it s not about the learning anymore Dan Kelley principal of Smithfield High School Rhode Island When students can focus less on the score and more on the learning

great things happen SBG is even more challenging in high school In this book the authors share their districts successes moving to alternate assessment methods that promote learning rather than solely achievement The proponents of grade reform highlight the arbitrary nature of grades the undue stress experienced by some learners and the potential interference in the process of learning On the other hand opponents reference the lack of accountability and a shift away from content knowledge that is perceived in many alternate assessment models This book outlines how to remove the negative impacts of grades while still maintaining a high level of accountability While the majority of other books in this space provide a rationale for why the shift is necessary these authors provide the classroom teacher s perspective and concrete examples of how these approaches can be developed and applied They provide sample assessments student work samples an accountability checklist a sample of their rubrics and a review of our collected data

Strengths-Based School Counseling JohnP.

Galassi,2017-07-05 Despite calls for a more preventive and developmental mode of functioning school counseling has tended to be driven by a reactive and sometimes crisis orientation Like social workers and school counseling and clinical psychologists school counselors typically function to alleviate deficits often in a small percentage of the students they serve Although this orientation has served school counselors well in many instances it is not empowering it does not serve all students and it does not replace those deficits with the type of positive characteristics and abilities that schools are attempting to develop This is the first book to provide a comprehensive look at the theory research and intervention strategies that comprise a strengths based developmental approach to school counseling In keeping with ASCA recommendations the Strengths Based School Counseling SBSC framework discusses academic personal social and career development outcomes for all students at the elementary middle and secondary school levels Other key features include integrative framework SBSC builds upon contemporary research from a variety of areas school counseling developmental psychology school psychology education positive psychology resiliency and social work evidence based interventions detailed examples of successful evidence based interventions and environments are presented at the elementary middle and high school levels for each major developmental area academic personal social and career identified in ASCA s National Model readability and pedagogy beautifully written the text includes lists of key points tables of student strengths illustrative examples and student exercises
