CSAS 6TH GRADE MATHEMATICS WELCOME LETTER

Dear Rising 6th Graders and Parents,

Greetings! I am delighted to share the upcoming school year with you in Sixth Grade Mathematics. I know you have learned a tremendous amount of math skills from Ms. Krause to better prepare you for our exploration in 6th Grade Math. We will be exploring fractions, ratios, rates, decimals, number lines, absolute value, graphing, expressions, equations, inequalities, polygons, area, volume, and data analysis—just to name a few!

If you are wondering about summer math packets or how to prepare for middle school mathematics, my advice is simple—continue mastering your basic math facts! There will be moments in which you will be expected to compute and solve math problems without a calculator. So, it is important that you practice the basic math skills of adding, subtracting, multiplying, and dividing single and multi-digit numbers. To assist you this summer, I have included links to practice websites below:

Addition Facts: <https://www.quia.com/r/10248.html> & <http://www.multiplication.com/games/addition-games>

Subtraction Facts: <http://www.multiplication.com/games/subtraction-games> &

Students, I am challenging you to set aside at least 30 minutes each day this summer to practice your math facts. Mastering these basic math skills will help you be very successful in 6th Grade Mathematics! You may also access these math skills by visiting our class website: csas6thgrademath.weebly.com

I look forward to leading you on your middle school mathematical journey next school year. Enjoy your summer, and I will see you soon!

With warmest regards,

Math Mysteries, Grade 6, 2012-10-22 The Math Mysteries series was designed to encourage students to think like math detectives using clues to solve problems. These four different types of activities are found in each book: story-based mysteries, activities that discover the mysteries found in mathematics, rhyming riddles, and crack the code problems. All activities are identified in the table of contents with the NCTM standards. Activities integrate problem solving with numbers and operations and can be used in a variety of ways. The forty engaging activities can be assigned individually, in pairs, as small group assignments, or can be solved together by the whole class. Students are also challenged to create their own math mysteries for others to solve. As students begin to think and write mathematically, they will enjoy the challenge found in each activity.
